Home: 510-504-5511 *do not give this number to the public!
Personal Cell: 510-421-8942 *do not give this number to the public!

AQUATICS WELCOME LETTER

Welcome to the team! We hope you find working with us an enjoyable and rewarding experience!

Please use this manual as a point of reference regarding the procedures, responsibilities and duties at the City of Newark's Silliman Family Aquatic Center. All team members are responsible to familiarize themselves with the information provided in this manual. This manual may be upgraded and/or modified upon management's discretion.

You have been selected to join the City of Newark team because of your special talents, skills, and experiences. As an employee of our Aquatics program, you will be faced with many new challenges. Your actions and behaviors influence the image of the City of Newark and all that it represents. Your roles will range from leaders to teachers, counselors to friends. Most of you will be helping guide people in an aquatic atmosphere. Your role will be to provide a healthy and safe environment for all the members who share our facility and add to the continued success of our programs.

The City of Newark also expects excellent customer service from every employee. We try to give our patrons special treatment and **YOU** are part of that. Customer service is a commitment and we strive to go above and beyond for any person who walks onto our facility.

The need to give up-to-date information and answer questions about our many programs makes all of our jobs quite challenging. Staff development is one of our main focuses, which is why we provide extensive training and support at all levels of our organization. There is ample opportunity to advance to positions with considerable responsibility. We are committed to making your experiences here positive.

You, as a part of our team, are our most important and greatest asset. Our job of preventing aquatic emergencies cannot be accomplished alone; it requires a great amount of teamwork. You will be working in a collegial atmosphere, remembering that every one of us has a critical role to play on this team. We all take great pride in our status and continually work hard to improve. Together, we can accomplish great things!

Once again, welcome to our Aquatics team!

CITY OF NEWARK RECREATION & COMMUNITY SERVICES DEPARTMENT MISSION STATEMENT

We provide recreational, educational and social opportunities that are competitively priced through our first class staff, facilities, services and programs to enrich the overall wellbeing of individuals and communities.

AQUATICS VISION STATEMENT & COMMITMENT

The Aquatic Department's vision is to enhance and develop community recreation, health and wellness. We achieve this by providing diverse, innovative aquatics programs and services that are offered to the community by highly skilled aquatics professionals. We strive to create opportunities for the community with recreation, health and wellness leading to a higher quality of life.

The term "**on duty**" must be honored, respected, and taken seriously. Take pride every time you put on your Newark Lifeguard uniform and be rescue ready. When a SFAC lifeguard is on duty, it means ANYTHING occurring inside the SFAC Aquatic Facility is the direct responsibility of the lifeguard(s) who are on duty at that time.

The term "on duty" means that in the SFAC Aquatic Facility, at all times the public can expect the following services from each and every lifeguard who is on duty:

Accident prevention
Water safety practices
Program knowledge
Proper rescue techniques
Proper First-Aid/CPR techniques
Prompt emergency situation response
Complete knowledge of all safety equipment
Enforcement of facilities rules, regulations and policies.
Professional and courteous customer service at all times

STAFF EXPECTATIONS

All team members assume an important role in the success of the Silliman Family Aquatic Center. This responsibility carries certain expectations in terms of performance, attitude, and execution of responsibilities. It is important that you are aware of our expectations before you begin and that you are confident you will be able to follow them.

We recognize that you may be a student first. We will not jeopardize your status as a student with unreasonable or unjustifiable job demands. However, by accepting employment with us, you are accepting a commitment for which you are responsible.

In conjunction with this manual and expectations outlined in this staff manual, expectations regarding Silliman Family Aquatic Center employment are outlined below:

- Your personal appearance must be of the utmost importance at all times. Always report to work well-groomed wearing the appropriate clothing. Please refer to Dress Code and Uniform Guidelines for the Aquatics Department.
- Common sense and courtesy will make your job more satisfying and rewarding.
- Always be respectful, cooperative and courteous to your fellow co-workers.
- Maintain a positive, polite, considerate, and cooperative attitude.
- Be available according to your stated availability.
- Attend all mandatory staff meetings and trainings.
- Handle all equipment carefully and know how it is to be set up, taken down, and stored properly.
- Be courteous but firm when enforcing our rules to our guests.
- Be constantly alert to potential hazards and situations that may endanger the safety of the participants.
- Visually inspect all areas that you are supervising to ensure a safe environment at the start of your shift.
- Know all policies and rules as outlined in this staff manual.
- Employees must leave backpacks, bags, and other personal belongings in the designated employee storage areas. This includes cell phones.
- Observe all the rules that our customers are required to observe and use common sense when mingling and conversing in public view.
- Show an interest in learning more, show pride in the facility, and show that you really want to be an employee at SFAC.
- Profane language and vulgar gestures are strictly prohibited for use by all staff, on or off duty.
- Smoking is prohibited in all work areas.
- All equipment is to be used in the manner for which it is designed, and is not to be modified or used in a non-standard way.
- All bulletin boards, walls and doors are reserved for SFAC approved information. Questions regarding bulletin boards should be referred to the Aquatics Coordinator.
- Employee bicycles, skateboards, skates or other modes of transportation need to be stored in the appropriate locations.

- Maintain focus on the operations and participants of SFAC. Studying, cell phone use, texting, emailing (non-work related), is prohibited. This dilutes the attention away from our core goals and is therefore NOT allowed while on duty.
- SFAC technology and resources are used for department business only, not for personal use.
- Oversee the pool and swimmers at all times to ensure a safe environment.
- Enforce rules and regulations regarding the safe and proper use of the pool and deck area.
- Secure the pool facility upon opening and closing.
- Report equipment, supplies, safety, and maintenance needs.
- Prepare pool facilities for scheduled activities.
- Prepare incident reports when appropriate.
- Participants are to be treated with respect and their input should be sought out.
- Understand SFAC and Department policies and answer all questions courteously and correctly.
- Patrons may approach you to express complaints, requests, or suggestions. If you are unable to provide a satisfactory answer (or action), rather than misinform, you should politely refer them to a staff member who is able to provide assistance. Documentation of patron comments and suggestions helps us to provide a quality experience for our users. If they would like to speak with the Aquatics Coordinator or Recreation Supervisor please give them a business card if the Manager is off site.
- Respond to and follow all appropriate emergency procedures.
- Attend all required meetings and in-service trainings.
- Report all concerns, problems and incidents such as a serious accident or injury, personnel issues, or situations that potentially have external ramifications immediately to the Aquatics Coordinator and maintain an open dialogue with them throughout the year. If a problem arises during the weekend or during evening hours, call the Aquatics Coordinator at home.
- If you have a question, concern, or problem, go directly to the source, deal with the matter professionally and privately, and keep your supervisor updated on the situation. Issues of conflict are to be resolved between individuals and in a manner which does not disrupt group cohesiveness. Opinions are to be respected, and all discussions are to be kept confidential and centered on the idea, not the individual.
- Words have consequences. Speaking irresponsibly can negatively effect morale, motivation, and community. Speaking in a responsible manner requires us to be sensitive to the harmful effects of hostile or disrespectful speech and to refrain from speaking in demeaning and/or harassing ways to patrons. Respect is a key factor in our dealings with people. Each of us has a responsibility to respect the dignity and uniqueness of others. We will support the Departments policy to prevent and prohibit acts of discriminatory harassment. This policy prohibits behavior (or speech) based on another's status, that has the purpose or effect of creating an intimidating, hostile or offensive environment.
- You are expected to treat the views and opinions that are expressed by your fellow Aquatics staff and the Full-time staff with respect and dignity, and all questions, comments, and suggestions regarding policy and programs are to be valid.
- If and when you make a mistake, take responsibility for it and take the appropriate measures to rectify the situation.
- Ensure that all facilities, equipment, and resources are utilized in the best interest of the citizens of Newark.
- Fulfill any other responsibilities as assigned by the Aquatics Coordinator, Recreation Supervisor, Recreation Director, and/or Head Lifeguards and Head Swim Instructors.

The Role Model Silliman Aquatics Team Member - The Standard

Lifeguard

1. Guard is on time for shift and recognizable and in proper uniform at least 15 minutes prior to shift.
2. Guard is rescue ready with: whistle, rescue tube, and fanny pack.
3. Guard is in lifeguard chair or patrolling near the perimeter of the pool in the designated areas.
4. Guard is not engaged in prolonged discussions with others.
5. Guard is alert and actively scanning with little distraction.
6. Guard exhibits professional demeanor by posture, behavior, attentiveness, and has a positive attitude.
7. Guard has insured pool deck is safe, organized, and all equipment is properly stored.
8. Guard uses proper subbing protocol, made scheduling changes in advance, communicating with appropriate staff members in writing, and has 100% attendance.
9. Guard checks e-mails and notifications on a regular basis, ensuring that they are knowledgeable of pool updates, training skills, schedules, and other important information.
10. Guard attends all mandatory meetings and trainings. If unable to attend, communicating with appropriate staff members at least 24 hours prior.
11. Guard completes proper opening, mid-day, and closing procedures.
12. Guard keeps electronic devices out of sight throughout the duration of their shift.

Swim Instructor

1. Swim Instructor is on time for shift and recognizable and in proper uniform at least 15 minutes prior to shift.
2. Swim Instructor is ready with all necessary equipment.
3. Swim Instructor is not engaged in prolonged discussions with other team members.
4. Swim Instructor is paying attention to student and actively instructing/providing feedback with little distraction.
5. Swim Instructor exhibits professional demeanor by posture, behavior, attentiveness, and has a positive attitude towards students.
6. Swim Instructor keeps deck organized, and all equipment is properly stored after lesson.
7. Swim Instructor uses proper subbing protocol, made scheduling changes in advance, and communicate with appropriate staff members in writing. Swim Instructor provides lesson plan to substitute teacher.
8. Swim Instructor checks e-mails and notifications on a regular basis, ensuring that they are knowledgeable of pool updates, training skills, schedules, and other important information.
9. Swim Instructor attends all mandatory meetings and trainings. If unable to attend, communicating with appropriate staff members at least 24 hours prior.

PROFESSIONAL IMAGE & UNIFORM

As a lifeguard, you are an important part of our facility's team. You contribute to the whole environment: if you look and act like a professional, and the facility looks like a well-run swim center. Guests at the facility are always watching you; it is important to remember that you are continually "on stage." If the guests view you as a professional, they will respond to your requests and directions much easier than if they do not have any respect for you or your position. To maintain your professional image please do the following:

Arrive Ahead Of Time

- Be in full uniform, easily identified as a lifeguard, neat and clean
- Bring auxiliary items you need (whistle, fanny pack, breathing barrier etc.); be prepared
- Be pleasant and courteous to staff and guests at all times
- Pay attention to placement and condition of your rescue equipment

Duty to Act

"Duty to act" is a term used to describe the legal duty owed by one person to another to act a certain way. As a lifeguard, you are considered a professional rescuer and have a duty to act anytime you are on duty. This means that on the job, you are legally obligated, within the bounds by the law of NEGLIGENCE. If you do not follow the standard of care and someone is injured, you may be considered guilty of negligence. As a lifeguard, you may be found negligent if you are inattentive and fail to notice a person who is drowning or in distress.

Lifeguard Uniform

***All City of Newark issued items must be returned at the end of your employment.**

City of Newark will provide the following uniform:

- Lifeguard T-Shirt
- Lifeguard Shorts
- Whistle
- Fanny Pack with pocket mask, and gloves

Swim Instructor Uniform

***All City of Newark issued items must be returned at the end of your employment.**

City of Newark will provide the following uniform:

- Swim Instructor Rash Guard

You are responsible for the following uniform:

- FEMALE STAFF: one-piece swimsuit
- MALE STAFF: swim trunks

MANDATORY IN-SERVICE TRAINING ATTENDANCE & SKILL EVALUATIONS

Staff Training

All staff members working at the Silliman Family Aquatic Center are required to attend scheduled staff trainings (in-service trainings). Staff trainings are used to maintain the skills that you will use in the event of an emergency. This is also a way that you are able to receive new information or updates from the management team.

Staff members who are unable to attend a training session must communicate with the Aquatics Coordinator and/or the designated Senior Lifeguard at least 24 hours in advance prior to the training date. Staff members must submit documentation verifying the reason of their absence to the Aquatics Coordinator and/or the designated Senior Lifeguard in order to be excused without penalty.

Examples of documentation include copies of:

- Dentist/Doctors/Orthodontist Appointment Confirmations
- Wedding invitations
- Travel confirmations (flight confirmation, hotel confirmation)
- School schedules
- Athletic practice or game schedules
- Counselor/Teacher appointment confirmations
- Extracurricular activity schedules
- Funeral notices
- Any other documentation to be evaluated and approved by the Aquatics Coordinator

Once documentation is provided, staff members are expected to attend the make-up training scheduled the following week. Unexcused absences for in-service trainings are unacceptable. Failure to communicate scheduling conflicts and multiple missed trainings will lead to disciplinary action up to, and including termination.

Employee Evaluations

All employees working at the Silliman Family Aquatic Center are subject to regular evaluations by Aquatics Management, Senior Lifeguards, or anyone appointed by management. These evaluations cover a wide area such as performance, rescue skills, safety, and teaching skills or other evaluations that are determined by the management team.

Evaluations will be unannounced to insure the integrity of the evaluation is maintained to a high standard. This may also include recorded videos of you working. All staff members must pass evaluations with a score of satisfactory or better. Staff not receiving at least a satisfactory score will be subject to retraining in the areas identified by the evaluator or are subject to suspension or termination at the discretion of Pool Management. *Refer to: **Appendix O: VAT Training Form, Appendix P: CPR Audit Form**

SCHEDULING & ATTENDANCE

All employees hired work on an hourly basis (less than 1,000 hours per year). Work schedules are completed ahead of time either in weekly, bi-weekly, monthly, and or seasonal patterns. If you have a scheduling conflict, please contact the Aquatics Coordinator or the Senior Lifeguard in charge of that shift. Your schedule will depend on your availability and the programs needs. Schedules can change at any time. You should check when to work every day or make sure your update notifications are on for any changes.

Communication

Staff members are expected to be in constant communication with the Aquatics Coordinator and Senior Lifeguards. Communication may be through: When-to-Work, in person, via email, or phone call.

Staff members are required to check When-to-Work or other channels of communication from the Aquatics Coordinator or Senior Lifeguards on a regular basis.

Your Schedule

We utilize an online system called When to Work. You should have received an account with a username and password already. You can access the system at any time by going to www.whentowork.com

Things that you can do on When-To-Work:

- View published schedules
- Pick up shifts - requires approval
- Trade shifts - requires approval
- Request time off - requires approval
- Send messages to other staff or managers
- Post a bulletin for everyone to see

You should check your When-To-Work account daily.

For more information and “how-to” tutorials on how to access/navigate the When To Work system, please refer to your “Welcome New Lifeguard” PowerPoint Presentation.

Overtime and Hours Limitations

You are not allowed to work overtime. Overtime is calculated on hours worked over 40 hours. It is your responsibility to make sure that you are not going over hours. Weekly hours are calculated Monday - Sunday.

All employees are hired as part time, at will, limited hours positions. You are given 1,000 hours per

fiscal year to resetting every July 1.

To make your hours last, you can work 20 hours a week at maximum. Anything over will deplete your hour's available faster and will result in you not being able to work.

Staff is expected to report in uniform, ready to work at the start of their shift. You should check in with your Senior Lifeguard prior to your shift for your rotation assignment. If you wish to show up early to work please show up no more than 15 minutes early.

Substitution Policy

Staff is responsible for covering hours in which they are scheduled to work. In the event that you are unable to work your shift, it is **YOUR** responsibility to find a qualified substitute. Substitutions and/or switching assigned hours will **NOT** be allowed without supervisor approval. All substitution requests must be made on the trade board on When-to-Work prior to the assigned shift. If the substitution is not accepted by another staff member, or not approved by the Aquatic Coordinator or Senior Lifeguard, the individual originally scheduled MUST WORK the assigned shift.

Late/Absences Policy

Staff is expected to be in uniform and ready to work at their scheduled time. **IT IS UNACCEPTABLE TO BE LATE**! If you are going to be late because of an emergency, please call the front desk or Senior Lifeguard working at the time as soon as possible so that arrangements can be made to assist you with coverage.

Here are examples of tardiness:

- Arriving to your assignment any time after your assigned shift.
- Starting programs late.
- Being late for rotation.

If tardiness becomes an issue with a member of our staff, disciplinary action will be taken.

Health is another important factor. PLEASE STAY HEALTHY! If you do get sick, please notify Aquatics Coordinator or Senior Lifeguard immediately (at least two (2) hours before the start of your shift) and arrange for someone to cover for you if you are unable to come to work. Should you become ill on the job and unable to perform your assigned duties, you must notify the Aquatics Coordinator or Senior Lifeguard immediately.

Time off Requests

Time off for vacations or other commitments need to be submitted in advance. Although you submitted a request off, it can be denied. We try to accommodate everyone the best we can. However, program needs are taken into consideration when approving or denying a request. Request for time off that is less than a week means you're responsible for finding a sub. We will only entertain a (1) week vacation.

Sick Time Policy

If you are sick, you must call the Aquatics Coordinator for your shift ASAP to let them know you are sick and cannot come into work. You cannot just **NOT** show up, you have to call and speak to someone. Email and/or texting are NOT acceptable forms of communication to call in sick. You must call the Aquatics Coordinator via phone and request Sick Leave at the time of your call-out.

When you return back to work on your next regularly scheduled work day, please complete the Absence Request Form. You must completely fill out the form, sign and date it.

On your timesheet you will write in "sick" in the space where you would write your time arrived and put the number of hours you were scheduled for that shift in the space for hours worked on the day you were supposed to work.

Submit your signed absence request form along with your timesheet by the regular due date (the 15th or last day of the month) as usual.

Once your 24 hours run out, you will not be paid for being out of work for any reason.

The 24 hours will reset and become available every July 1st and expire on June 30th.

<u>Remember that the sick leave is intended to be used ONLY when you are sick. If it is discovered that the policy is being misused it may result in termination.</u>

TIMESHEET & PAYROLL SUBMISSION

Employees are not allowed to work beyond assigned work schedules. Staff must have approval to work less or more hours than currently scheduled from their supervisor. Staff are not permitted to work more than 40 hours/week without approval. Aquatics staff members are not allowed to work over 8 hours during the day without approval. Additionally the shift supervisor (Senior Lifeguard or Aquatics Coordinator) should initial your timesheet after every shift.

Timesheets are due on the day immediately following the end of the pay period by 8 a.m. The hours worked must be entered on your timesheet and match what was assigned on When-to-Work. Staff need to sign and date their own timesheets before submitting them for approval. Timesheets that are not properly filled out will be sent back to the employee for correction. Failure to submit your timecard correctly may result in receiving your earnings in the next pay period.

All paychecks are issued on the 15th & 30th of each month or you can arrange for direct deposit (highly recommended).

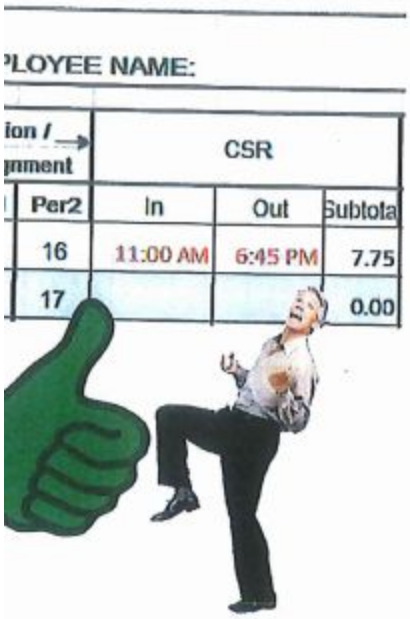
How to Complete and Submit your Timesheet

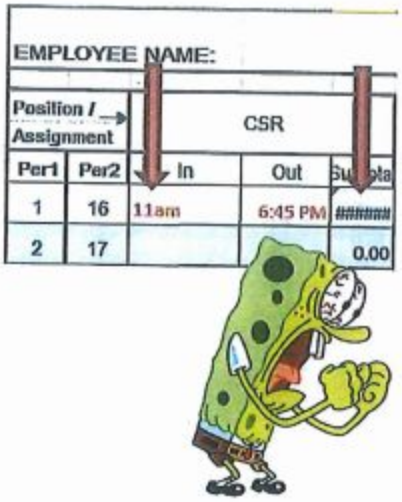
You are responsible for the following:

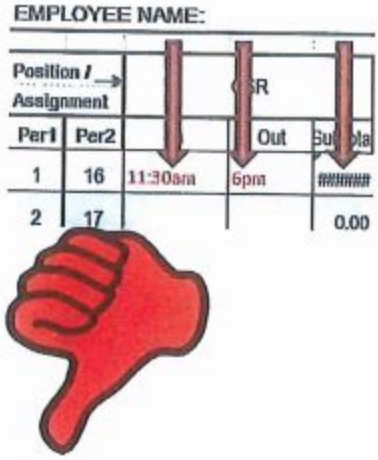
- Filling out your timesheet properly
- Making sure that all hours are accurate and included on your timesheet
- List the hours under the position worked lifeguarding as LGI or Swim Instructor as AQI

How to use the writable PDF timesheet:

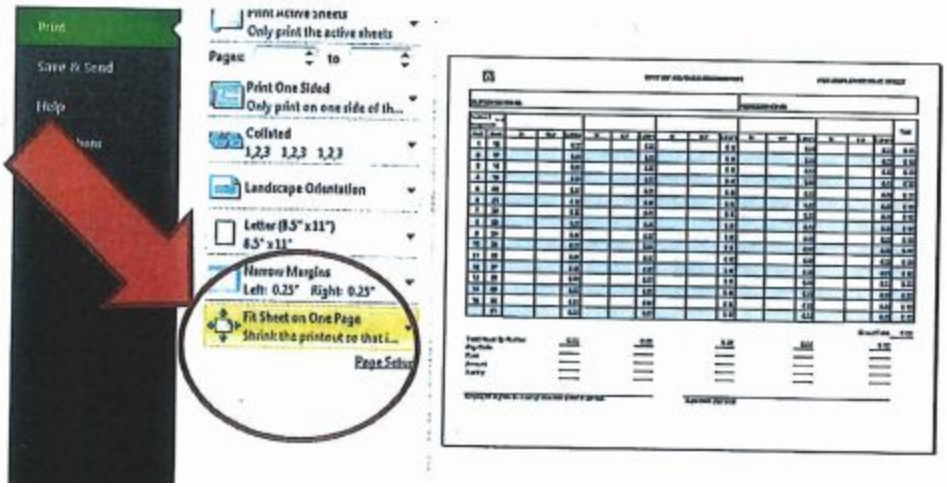
- When filling out timecards on excel you put the time you started or ended, a space and then either AM or PM.
  - Without the space and AM/PM it will not calculate your hours.







- Make sure you save it so it doesn't delete all of your hard work. Save it as the time period end date ex: September 31 2017
- When you are all done and ready to turn it in, print it out, sign it, and turn it in as normal
  - It should automatically print it to fit on one page, but if it doesn't, set it to do so.



Electronic Time Cards

Where you can find your time card:

- Up at the front desk located at the party desk (in the corner)

How to access your time card:

- Time cards are saved in a folder on the desk top "Lifeguard time sheets"
- Inside this folder are folders for every lifeguard– open your folder to access your time sheet.

Sick Leave Submission

If you are ever sick and wish to utilize your sick time, you will need to fill out the following form. This form can be found on **newarkguard.com**, or you can request a hard copy from the Aquatics Coordinator.

An absence request form will need to be attached to your timesheet when you turn it in.

Please follow the steps below to complete your form:

1. Write in your legal name.
2. Fill Out the Department as Recreation.
3. Fill out the date.
4. Check Box 405 - PST Sick Leave
5. Indicate the Beginning Date of Leave
6. Indicate the Total Hours
7. Sign the employee area and date it.
8. Complete the area upon your return from leave and indicate the amount of hours.
9. Sign the form in the last box
10. Staple the form with your timesheet

INTERACTING WITH GUESTS & REPORTING

Customer Service Expectations

- Every customer and visitor is entitled to prompt and courteous service and attention. Always greet customers and provide to those in need of information or assistance, with a pleasant, "How can I help you?"
- Know the rules so that you can explain and interpret them to the public.
- Be the best source of information for the members. If you cannot answer a question, kindly direct them through the chain of command and hand out a business card.
- Be courteous to our customers; treat them as guests. Do not shout out orders and never argue with a patron. Treat them as you would want to be treated.
- No employee should ever be too busy to answer a question, provide a friendly greeting or give out information in a clear and pleasant manner.
- Respond to suggestions with a positive attitude. The facility is open for the benefit of the community, not the employees. Do not find fault with the operation of the facility in front of the public. If there is something that you feel is wrong with the operation of the facility, discuss it with your appropriate supervisor in private.
- If a customer has a complaint or suggestion, encourage them to speak directly to the appropriate person in charge. Or write their complaint down to be addressed.
- Customer conflict resolution: You can expect that most members will be cooperative, however occasionally you might encounter a difficult situation. For major issues direct customer to Senior staff.
- Whenever a challenge arises:
    - Call the member(s) to an area away from other members.
    - Be an active listener. Do not raise your voice. Be sure to listen and think before you speak.
    - When dealing with an irate member, remain level headed and professional.
    - Allow the person to fully explain their point of view, and then calmly explain the policy and rationale behind it.
    - If the customer continues to be uncooperative or you feel yourself losing your patience or control of your temper, contact and refer the customer (s) to speak directly to the appropriate person in charge or the Aquatic Coordinator.
    - You should never threaten anyone with the expulsion from the facility. Only the Aquatics Coordinator, Recreation Supervisor, or Head Lifeguard will decide when it is necessary to expel an individual or determine if it is appropriate to contact the police.

Rule Enforcement

Rule enforcement is always difficult. No one likes to have his or her actions restricted. Just as laws govern society, swimmers are governed by rules for their health and safety. When enforcing rules please be as professional as possible. Following the guidelines listed below should help you with rule enforcement.

Understand and Explain the Rules: As a lifeguard you should understand the reason for a rule and be able to explain it. You may find that once you have explained a rule to a swimmer, enforcing it will be easier. For example try replacing "Mister, you can't bring that bottle in here,"

with "I'm sorry sir, bottles are not allowed in the pool by order of the Health Department; broken glass in the pool is almost impossible to find and remove."

Be Consistent in Enforcing Rules: To be consistent means to enforce the same rule in the same way every time. You may want to modify the way you inform an adult that they have broken a rule in order to save time and embarrassment.

Enforce Rules Uniformly: Uniform rule enforcement means that if two different swimmers are violating a rule, both should be stopped. Remember that rules should be fair for everyone using the pool.

Use the Positive Approach: When you make corrections, use the positive approach. For example, instead of saying, "don't run," say, "Walk please." Remember that people are coming to the pool for fun and enjoyment. We want them to be safe, but also to have a good time. As a professional the manner in which you enforce rules is very important.

Know Where the Rules are Posted: It is a good idea to remind swimmers where the rules are posted. The posted rules are a backup authority for you. A complete copy of the rules is available in the office.

Refer Problems to your Supervisor: If someone keeps violating a rule do not hesitate to seek assistance from the Senior Lifeguard. You cannot allow yourself to be distracted from your zone by spending a lot of time dealing with a guest.

Unruly guests: For a patron who is under the influence of drugs or alcohol or is acting unruly, notify the manager as soon as possible. The manager will take charge of the scene and will get rid of the patron either passively or with the assistance of the police. Do not under any circumstance try to deal with the individual by yourself.

Obtaining Consent

In every instance where first aid is to be provided, the victim's consent is required. It should be obtained from every conscious, mentally-competent adult. The consent may be either oral or written. Permission to render first aid to an unconscious victim is implied and a professional rescuer should not hesitate to treat an unconscious victim. Consent of a parent or guardian is required to treat a minor. However, emergency first aid necessary to maintain life may be provided in the absence of consensual caretakers you must call 911 at once.

Incidents & Reporting

In the event that an accident or incident occurs, we must document and report these events. These guidelines are intended to assist in the timely and accurate documentation and reporting of accidents and incidents.

Forms below are privileged and confidential communication to the City of Newark Attorney. Copies cannot be given out. Request must be given to the city of Newark Clerk by any requesting party.

Current forms in use include:

- **City of Newark Water Rescue Report (Appendix K)**
  Use when a lifeguard must enter the water.
- **SFAC Incident Report (Appendix J)**
  Use as a narrative for an incident.
- **SFAC Accident/Incident Report (Appendix J)**
  When a person is injured.

Record Keeping

It is necessary to completely fill out the necessary forms whenever first aid is administered, no matter how minor. Records may be used in legal matters, so ensure that your report notes are accurate, factual, contain all relevant information, and are based on observations rather than opinions.

When preparing a report, adhere to the following guidelines:

- Prepare the proper report.
- State only facts, never speculate or use your opinion.
- Check for spelling, punctuation, and grammatical errors before submitting your report to higher management.
- The information should be kept confidential.

BEING A PART OF THE SILLIMAN TEAM

Employee Rests & Breaks

When an employee is not lifeguarding or teaching this does not constitute a break. A break in the guarding rotation or in lessons does not necessarily constitute free time. In the event of an emergency the break guard will be required to respond as needed along with the Senior Lifeguard. You may be required to perform certain maintenance or other duties while on break. Only with permission from your Senior Lifeguard or Aquatic Coordinator may you go on a break. A break is a break from the pool not from work.

Staff Areas & Lockers

The staff room is where we ask that you keep your belongings. Lockers are available and will be on a first come first served basis. The staff room is your place to "hang out" before and after your shift, or while on break. Please do not hang out at the front desk, in the Aquatics Office or on the deck. If a group of lifeguards are relaxing on the deck, it gives the public the perception that they are goofing off while on duty. As the staff room is your place to hang out, it is also your responsibility to keep clean. The public can see into the staff room!!

Please remember that if it does not belong to you then do not take it or use it, without permission from its owner!

Zero Tolerance Staff Restroom Policy

At NO time should there be multiple staff members in the staff bathroom when the door is closed. Multiple staff can be in the staff bathroom with the door wide open. Staff members who violate this policy will be severely reprimanded, with consequences not limited to immediate dismissal.

Staff Relations & Conflict Management

Staff must work together as a team to create a fun, safe, and enjoyable atmosphere for the participant to ensure the quality and success of the program.

- Conflict is an inevitable part of effective work groups. When dealt with constructively, conflict can push team members to explore diversity, differences of opinion, personality or style and to develop solutions that are more effective than when only one solution is explored. If conflict is left unresolved, it can unravel relationships and eventually effectiveness and productivity of the work group suffers.
- Each and every staff member is an important part of the team. Staff members must treat each other with respect and courtesy.
- Any on or off-duty activity or social situation that will negatively affect your job performance and interaction with co-workers is discouraged.
- Physical display of affection between staff members is prohibited.
- Personal conflicts should be resolved in the following manner:
    - Speak to the "problem" staff member directly.

    - Don’t complain or gossip to other staff members; that will only create more friction.
    - Do not let this escalate into a shouting argument. Talk calmly and avoid insults.
    - If a resolution is not met, talk to the Aquatic Coordinator or Aquatic Supervisor about the issue.
- Conflicts with your direct supervisor (Senior Lifeguard/Swim Instructor) should be communicated to the Aquatics Coordinator.

EMPLOYEE DISCIPLINARY PROCEDURES

While the majority of employees exercise self-discipline in the workplace, the supervisory staff is sometimes faced with situations where employees have poor work habits or fail to maintain acceptable standards of performance. **The purpose of the employee discipline procedures is to CORRECT, not to PUNISH.** The corrective action is to be based on the nature of the offense and the employee's work habits. Infractions include, but are not limited to, tardiness, absenteeism, improper uniform, and unprofessional behavior. Separate offenses are handled cumulatively thus you do not receive 10 verbal warnings for 10 different offenses. We feel an employee should know the rules and any violation of them begins a pattern of behavior. This unwanted behavior sets a tone for the entire staff. Thus, any and all issues will be handled as a whole for any individual not as separate events. Depending on the severity of the infraction, the Aquatics Coordinator can change the level of infraction level. *Refer to: **Appendix L: Disciplinary Form**

1st infraction: a verbal and/or written warning
2nd infraction: a written warning
3rd infraction: Suspension for no less than 1 week/probation
4th infraction: you will be terminated from your position

Disciplinary Procedure Definitions

Verbal Warning: Given in private. Opportunity for employee and supervisor to express their views, come up with solutions, and agrees on a plan. If improvement does not occur over agreed period then further action will be taken, including possible suspension. Verbal warning is documented and placed in file in the event of another occurrence.

Written Warning: Given in private. Explanation of the seriousness of offense. A reminder of previous discussion regarding behavior. A copy of written warning on file and a reminder that if problems continue, then the next step will lead to suspension or possibly termination.

Suspension: Employee is given time off without pay to decide whether or they want to be a part of the Aquatic Program and abide by its rules. The employee will also be warned that another violation will result in termination.

Termination: After several opportunities to modify behavior, it is now assumed that the interests of both the employer and the employee are best served by complete separation. While it is our intent to follow the disciplinary path if warranted with an employee, however there are some offenses which are so egregious that the only option is termination. These offenses would include sexual harassment, physical altercation with anyone, knowingly causing an unsafe condition, theft, damage to City Property, etc.

The following warrant immediate suspension or dismissal:

Theft or destruction of City property
Use of drugs or alcohol on the job
Fighting on the job
Threatening another employee
Violation of safety rules
Sleeping on the job
Missing work for no reason

EMERGENCY ACTION PLANS

Emergency Action Plan (EAP)

- The Aquatics Supervisor, Aquatic Coordinators, and/or the Senior Lifeguard on duty shall determine the need for a facility evacuation and will direct appropriate staff to certain duties.
- All communication shall be verbal face-to-face or by walkie-talkies.
- The Aquatics Supervisor, Aquatic Coordinators, and/or the Senior Lifeguard on duty shall determine when it is appropriate to re-enter the facility after an evacuation.
- "Activate EAP" and "Check that EMS has been dispatched" indicates to call 911 or the City of Newark Emergency dispatch. Employees shall never use cellular phones to dial 911.

Non-Life Threatening/Water Rescues

These include minor scrapes, bruises, cuts, complaint of illness, incidents where lifeguard needs to enter the water for distressed swimmers, or active drowning victims. (See flow chart on page 24)

- Rescuer blows one long whistle and either enters the pool to rescue the victim or assists with minor injuries occurring outside the pool on the deck
- Other guards at the pool cover rescuer's surveillance area until a roving guard relieves the empty rescuer's station, and a lifeguard on break relieves the empty roving position
- If a rescue involves the water slides, dispatch lifeguard signals to stop dispatch and hits the E-STOP button
- The rescuer notifies the Senior Lifeguard, or if the rescuer has to enter the water, another lifeguard at the pool completes this task
- Senior Lifeguard will respond and requests a lifeguard on break to respond to the incident to relieve the rescuer's position
- The rescuer takes the victim to the First Aid room for first aid treatment and documentation
- Minor blood spills resulting from minor accidents should be cleaned and taken care of according to protocol, ¼ cup bleach to 1 gallon of water
- The rescuer providing first aid completes an Accident/Rescue report with the victim and forwards it to the Senior Lifeguard and Aquatic Recreation Supervisor. If the victim is a minor, the minor's parent or guardian shall be notified

Life Threatening/Water Rescues

Life threatening/water rescues involve head, neck, and back injuries, diving accidents, dislocations, bone fractures, profuse bleeding, cardiac or breathing injuries, and unconscious or passive/submerged victims. (See flow chart on page 24).

- Rescuer blows air horn or two long whistles, performs the rescue, and immobilizes the victim at a place of safety. First aid station/backup lifeguard responds to call and acts as a secondary rescuer to help immobilize and remove victim from the water
- All other guards at the pool cover empty rescuer's zone of coverage until a break guard is available to take over the zone; The Senior Lifeguard designates when and if to close the pool.
- If rescue involves the water slides, dispatch lifeguard signals to stop dispatch and hits the E-STOP button

- The rescuer notifies the Senior Lifeguard by two-way radio, or if the rescuer has to enter the water, another lifeguard at the pool completes this task
- The Senior Lifeguard requests lifeguards on break to respond to the incident to relieve the rescuer's position, assist in the rescue, provide control crowd, and other tasks at the direction of the Senior Lifeguard
- The Senior Lifeguard designates a lifeguard to contact the **Emergency Medical Services Dispatch by calling 911 or by using one of the emergency phone lines on the pool deck** to report the nature of the accident and direct them to the closest access gate to the victim's location. The victim(s) will not be moved out of the area until EMS arrives. If EMS transports the victim out of the Aquatic Center the name and number of the Emergency Facility the victim is being taken to needs to be put on the accident report
- The Senior Lifeguard determines if the pool or surrounding area needs to be closed, and assigns responding lifeguards to assist with pool closure and crowd control
- The Senior Lifeguard determines when the pool can be reopened and relieving lifeguards returned to the break room or other posts
- As soon as possible, the Rescuer and other involved employees shall complete an Accident/Incident report and shall provide it to Senior Lifeguard. If the victim is a minor, the minor's parents/guardians shall be notified
- All media inquiries will be directed to the Aquatic Senior Supervisor or emergency services spokesperson. **They are the only individuals permitted to make media statements**.

Equipment and Water Quality Failure

The Pool Technician shall immediately notify the Aquatic Senior Supervisor and the Aquatics Coordinator if pool equipment is not working properly and/or if the water quality fails to meet standards.

- If the nature of the equipment failure or cause of poor water quality cannot be immediately rectified, the Aquatic Recreation Supervisor or the Aquatic Center Coordinator shall close the affected pool until the equipment is repaired and water standards are met.
- The pool shall be closed for use if the main drain is not clearly visible from the pool deck.
- Pool Technician shall repair equipment, return water quality to standards or contact an outside contractor to make necessary repairs as soon as possible.
- Pool Technician or Aquatic Senior Supervisor or Aquatics Coordinator shall open the pool only after the water quality is clear and has returned to acceptable water quality standards.

Fecal Contamination in the Pool

In the event of fecal contamination in the water, we will follow the recommendations established by the Centers for Disease Control which include evacuation of the pool, removal of stool, elevate chlorine to either 2.0 PPM for formed stool and keep pool clear for 20 minutes, if loose stool elevate chlorine to 20.0PPM for 8-12 hours. Disinfect any equipment and backwash filters after time parameter has been met.

Violence or Threats of Violence

Always notify your supervisor as soon as you can when a patron, a vendor, a coworker, or a member of the public is violent, demonstrating disturbing behavior, or threatens anyone.

Things to remember if you encounter a hostile person or persons:

- Stay calm and listen attentively.
- Be polite.
- Maintain eye contact.
- Be courteous and patient.
- Move and speak slowly, quietly and confidently.
- Be empathetic to the person and acknowledge the person's feelings. Focus your attention on the person to let them know that you're interested in what they have to say.
- Maintain a relaxed yet attentive posture and position yourself at a right angle to the person rather than directly in front of the person.
- Make sure there is 3′ to 6′ of space between you and the person (beyond arm's reach.) Arrange yourself so that the person cannot block your access to an exit.
- Use delaying tactics to give them time to calm down. For example, ask them if they would like a drink of water (in a disposable cup).
- Be reassuring and point out choices. Break the big problems into smaller, more manageable problems.
- If the situation is not easily resolved, call 911.

Avoid actions that will increase the hostility.

- Never take sides.
- Never agree with distortions.
- Never reject all their demands from the start.
- Never brush the person off, be cold, or beat around the bush.
- Never pose in challenging stances. (For example, make sudden movements, place hands on your hips or cross your arms.)
- Never engage in violent activities with anyone. Back off. Be cool.
- Never challenge, criticize, be impatient, be condescending, threaten, or dare the person.
- Never try to make the situation seem less serious than it is.
- Never make false statements or promises you can't keep.

AQUATIC CENTER EVACUATION & LOCK DOWN STANDARDS

Although a very rare occurrence, a situation might arise that requires the entire Aquatic Center to be immediately evacuated.

The Center will be evacuated in the event of a:

- Fire or Fire Alarm (See EAP Flow Chart on Page 27).
- Suspicious Package or Letter
- Bomb Threat (See EAP Flow Chart on Page 29).
- Hostage Incident
- Biological Threats
- Gas Leak
- Earthquake (See EAP Flow Chart on Page 26).

The Center may be evacuated in the event of a:

- Chemical Release
- Significant Earthquake
- Power Outage (See EAP Flow Chart on Page 25)
- Flooding
- Odor Complaints
- Noise Complaints
- Workplace Violence
- Civil disturbance involving the Aquatic Center
- Terrorist Threat or Actions involving the Aquatic Center
- Any event that may lead to undue injury to any individual within the facility

Evacuations can be initiated through any one or more of the following:

- Voice command
- Installed fire and smoke alarm system
- By any employee blowing their whistle

The Center will be locked down in the event of a:

- Missing Child (See EAP Flow Chart on Page 28)
- Active Shooter on Site

EMERGENCY ACTION PLAN

LIFE AND NON-LIFE THREATENING RESCUES

PRIMARY LIFEGUARD

Recognize Emergency

- Assess situation
- Activate EAP by using rescue horn/whistle
- Guard to left acts as back-up guard
- Initiate appropriate rescue procedures

NON-LIFE THREATENING

- Administer First Aid
- Fill out Accident Report
- Back to rotation

ACTIVATING EAP

1 short whistle blast: Get the attention of a guest

2 short whistle blasts: Assistance needed from Senior Lifeguard

1 long whistle blast: Activate EAP for water or land rescue

2 long whistle blasts: Life-Threatening Emergency – Rescue Bag & Back Board Needed.

EVACUATION SITES

1. Phase 1 gymnasium
2. Softball Fields
3. Soccer Fields

LIFE THREATENING

- Pool clear
- Contact EMS
- Crowd control
- Meet EMS
- Manage AED/Oxygen/First Aid
- Multiple rescuers if needed

REPORT

- Fill-out all necessary reports
- Contact appropriate senior staff
- Bystander statements
- Contact pool management

FOLLOW-UP

- Staff de-briefing
- Media Spoke Persons & Statements as directed by the city attorney or aquatic director.

EMERGENCY ACTION PLAN

Power Outage

MOD/SBA

Recognize Emergency

- Assess situation
- Activate EAP by announcing over PA system
- Initiate appropriate emergency procedures

Black Out

- Clear Facility/crowd control
- Call Dispatch to notify of outage
- Acknowledge alarm at alarm panel
- When power back on, check building for problems
- Allow guests re-entry when building is cleared by MOD/SBA

Brown Out

- Clear facility/crowd control
- Call Dispatch to notify of outage
- Acknowledge alarm at alarm panel
- When power back on, check building for problems.
- Allow guests re-entry when building is cleared by MOD/SBA.

ACTIVATING EAP

- MOD/SBA notify staff to evacuate the building
- Call Dispatch from land line to notify of outage

EVACUATION SITES

1. Phase 1 gymnasium
2. Softball Fields
3. Soccer Fields
4. Front of building

REPORT

- Fill-out all incident report
- Contact supervisor

FOLLOW-UP

- Staff de-briefing
- Notify Supervisor or Department Head.

EMERGENCY ACTION PLAN

Earthquake

MOD/SBA

- Assess situation
- Activate EAP by announcing over PA system
- Initiate appropriate emergency procedures

Without Injuries

- Immediately seek cover until quake is over.
- MOD/SBA evacuate the building
- Contact dispatch to send fire department to assess damage.
- When building clear by Fire department, re-entry allowed.

With Injuries

- Immediately seek cover until quake is over.
- MOD/SBA evacuate the building
- Contact dispatch to report injuries and send fire department to assess damage.
- Attend to first aid issues
- Meet EMS
- When building clear by Fire department, re-entry allowed.

ACTIVATING EAP

Announce over PA system: Location to evacuate too

Call Dispatch.

REPORT

- Fill-out all necessary reports
- Contact appropriate senior staff

EVACUATION SITES

1. Softball Fields
2. Soccer Fields

FOLLOW-UP

- Staff de-briefing
- Notify Supervisor or Dept. Head
- Media Spokesperson/Statements

EMERGENCY ACTION PLAN

Fire Emergency

MOD/SBA

- Assess situation
- Activate EAP by announcing over PA system
- Initiate appropriate emergency procedures

NON-LIFE THREATENING

1. Small Fire
2. Clear the area
3. Contain and put our fire with extinguisher
4. Fire Dept. checks and clears building for safe re-entry

LIFE THREATENING

1. Large or Unknown
2. Clear Area
3. Contact EMS
4. Crowd control
5. Meet EMS
6. Fire Department checks and clears area for safe re-entry.

ACTIVATING EAP

1. Pull fire Alarm
2. Announce over PA system: Get the attention of a guest
3. Call Dispatch

REPORT

1. Fill-out all necessary reports
2. Contact appropriate senior staff
3. Bystander statements

Contact supervisor or Department Head

EVACUATION SITES

1. Phase 1 gymnasium
2. Softball Fields
3. Soccer Fields

FOLLOW-UP

1. Staff de-briefing
2. Media Spoke Persons & Statements
3. Accident Investigation
4. Follow up training on future prevention

EMERGENCY ACTION PLAN

Missing Child

SR. LG/MOD/SBA

- Assess situation
- Activate EAP Initiate appropriate emergency procedures

- MOD/SBA gets description and name of child and last whereabouts.
- Designate a meeting spot and conduct quick search each room and area for child.
- If not found, announce over PA system for child to report to meeting spot.
- Staff assigned to all exits to watch for children leaving and asking questions: Is this your child, are you lost, where are your parents, etc.
- Contact Police if not found in reasonable amount of time, 15 minutes

REPORT

1. Fill-out all necessary reports
2. Contact appropriate senior staff

FOLLOW-UP

1. Staff de-briefing
2. Notify Supervisor or Dept. Head
3. Media Spokesperson/Statement/City attorney

EMERGENCY ACTION PLAN

Bomb Threat

MOD/SBA

- **Assess situation and assume that all threats are real**
- Activate EAP by announcing over PA system
- Initiate appropriate emergency procedures

- Call Dispatch
- Clear facility/crowd control to exterior evacuation areas
- Lock doors
- Remain outside building until cleared by Fire/Police for safe re-entry.

EVACUATION SITES

1. Phase 1 gymnasium
2. Softball Fields
3. Soccer Fields
4. Front of building

REPORT

1. Fill-out all necessary reports
2. Contact supervisor

FOLLOW-UP

1. Staff de-briefing
2. Notify Supervisor or Department Head.
3. Media Spokesperson/Statements

EMPLOYEE EXPOSURE AWARENESS & SAFETY PROCEDURES

Catastrophic Incident Plan

A catastrophic incident is defined as: an incident that involves a death, near death, or a natural disaster. Beyond what is already listed in the emergency action plan, such as fire, earthquake, bomb threat, and biological threats, the Catastrophic Incident Plan also includes incident debriefing, counseling, and accident investigation.

Exposure Control Plan

Training for Bloodborne Pathogens will be provided on an annual basis including how to clean-up infectious materials and prevent any disease transmission.

Hepatitis B vaccination series is available to all employees that have the potential for exposure to Bloodborne Pathogens. If you are interested in receiving the series through the City of Newark, please let your supervisor know.

Universal Precautions for Blood and Body Fluids/Substances

The following GUIDELINES FOR PREVENTING TRANSMISSION OF INFECTIONS IN HEALTHCARE SETTINGS has been recommended by the Center for Disease Control (CDC) and the American Hospital Association. These guidelines are applicable to ALL GUESTS, and as such are referred to 'Universal Precautions for Blood and Body Fluids or Substances'.

Infection Control Precautions

1. Handle the blood and body fluids/substances of ALL GUESTS as potentially infectious.
2. WASH HANDS before and after all guest and specimen contact.
3. Wear GLOVES when contact with blood and/or body fluids/substances is anticipated. Remove the gloves after each individual task.
4. Wear a GOWN or disposable plastic APRON when splashing with blood or body fluids/substances is anticipated.
5. Wear a MASK for protection against airborne-transmitted diseases.
6. Wear protective EYEWEAR and MASK, if facial splatter with blood or body fluids/substances is anticipated.
7. Place used syringes immediately in a nearby puncture-resistant container. Generally, needles should NOT be recapped or manipulated in any way.
8. Process ALL LABORATORY SPECIMENS as potentially infectious.
9. Place equipment needed for emergency resuscitation, e.g. BVM, and/or mouthpieces in enough quantity in all areas in which the need for resuscitation is predictable. Replace used equipment with clean equipment as soon as the resuscitation is over.

Employee Health & Safety Protocol

1. WASH YOUR HANDS, arms, face, etc. immediately and thoroughly if you have had unprotected contact with blood or body fluids/substances.
2. Protect your NON-INTACT SKIN (e.g. chapped, abraded, or afflicted with dermatitis, cut, blistered and open, etc.) from contact with blood or body fluids/substances. Use a physical barrier, e.g. gloves.
3. Contact your supervisor when you have had an exposure to blood or body fluids/substances, such as a needlestick or puncture, or a splash of blood or body fluid/substance onto non-intact skin or mucous membranes.

Recreation Water Illness Guidelines

FORMED STOOL/VOMIT/BLOOD

1. Clear Pool
2. Remove material with net – use safe handling precautions
3. Check Chlorine level – raise to 2.0 ppm if not always at this level
4. Leave net in pool to disinfect.
5. After 25 minutes of 2.0 or higher – Let patrons back into pool
6. Fill out Incident Report

NON-FORMED STOOL – DIARRHEA
(Unless infant – if unable to determine, assume not an infant)

1. Clear Pool for 8 hours and put pool closed signs
2. Remove material with net – use safe handling precautions
3. Raise Chlorine to 20 ppm
4. Leave net in pool
5. Vacuum pool. Clean vacuum after to prevent future contamination from entering other pools.
6. After 8 hours Backwash filters
7. Turn chlorine off and wait until chlorine drops below 8.0
8. Let patrons back into pool
9. Fill out Incident Report

BLOOD/URINE/STOOL ON DECK OR LOCKER ROOM

1. Isolate area
2. Use universal precautions
3. Make mixture of 1 part bleach 9 parts water
4. Spray area
5. Let stand for 15 minutes
6. Clean up with paper towels/dustpan/etc.
7. Spray area with Bleach water solution and let stand for 15 minutes
8. Rinse area
9. Soak affected cleaning items for 15 minutes in a bleach water solution.

SB-258 Cleaning Product Right to Know Act of 2017: SDS SHEETS

The SB-258 Cleaning Product Right to Know Act of 2017 is a law that relates to cleaning products that are used in the workplace (including general cleaning, air care, automotive, or polish or floor maintenance products used primarily for janitorial, industrial or domestic cleaning purposes). As such, employers that have these designated cleaning products in their workplace must obtain the safety data sheets from the manufacturers and make them available at the workplace.

What is a Safety Data Sheet: The SDS includes information such as the properties of each chemical; the physical, health, and environmental health hazards; protective measures; and safety precautions for handling, storing, and transporting the chemical. The information contained in the SDS must be in English (although it may be in other languages as well). If another language is needed please let us know.

Safety Data Sheet Sections:
In addition, OSHA requires that SDS preparers provide specific minimum information as detailed in Appendix D of 29 CFR 1910.1200. The SDS preparers may also include additional information in various section(s).

Sections 1 through 8 contain general information about the chemical, identification, hazards, composition, safe handling practices, and emergency control measures (e.g., fire fighting). This information should be helpful to those that need to get the information quickly. Sections 9 through 11 and 16 contain other technical and scientific information, such as physical and chemical properties, stability and reactivity information, toxicological information, exposure control information, and other information including the date of preparation or last revision. The SDS must also state that no applicable information was found when the preparer does not find relevant information for any required element.

The SDS must also contain Sections 12 through 15, to be consistent with the UN Globally Harmonized System of Classification and Labeling of Chemicals (GHS), but OSHA will not enforce the content of these sections because they concern matters handled by other agencies.

Where can I find these new Safety Data Sheets?

There is a Safety Data Sheet binder in the workroom behind the front desk. Additionally, you can find an online PDF version located on your employee portal both Building and Lifeguarding staff under the following location:

newarkguard.org
Staff Forms> Z: Cleaning Supplies Safety Data Sheets>

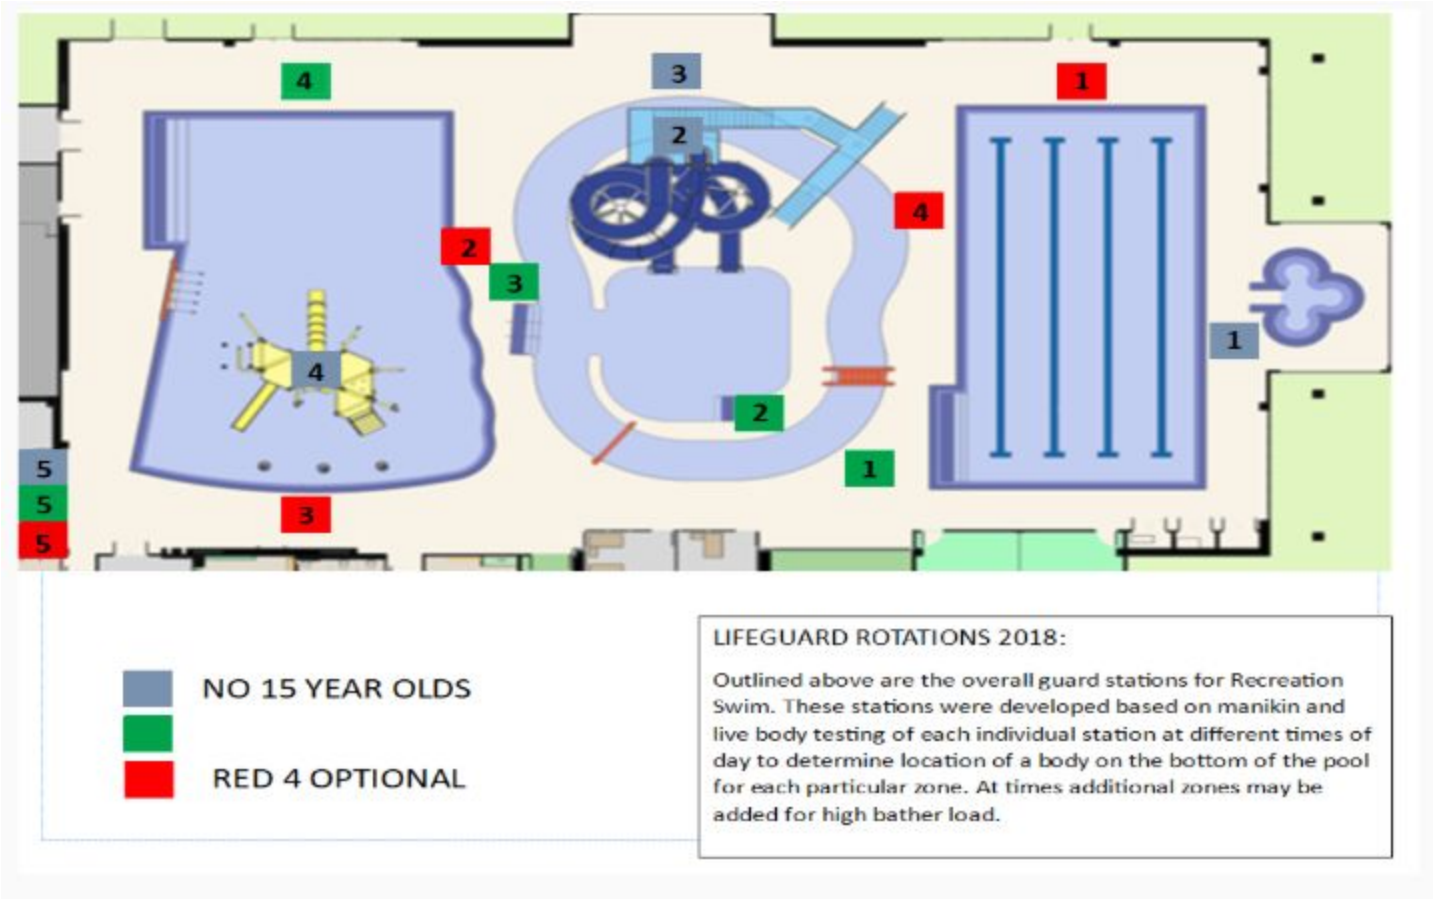
If you have any questions please speak to your supervisor.

LIFEGUARDING AT SILLIMAN CENTER

Lifeguard Rotations

CITY OF NEWARK

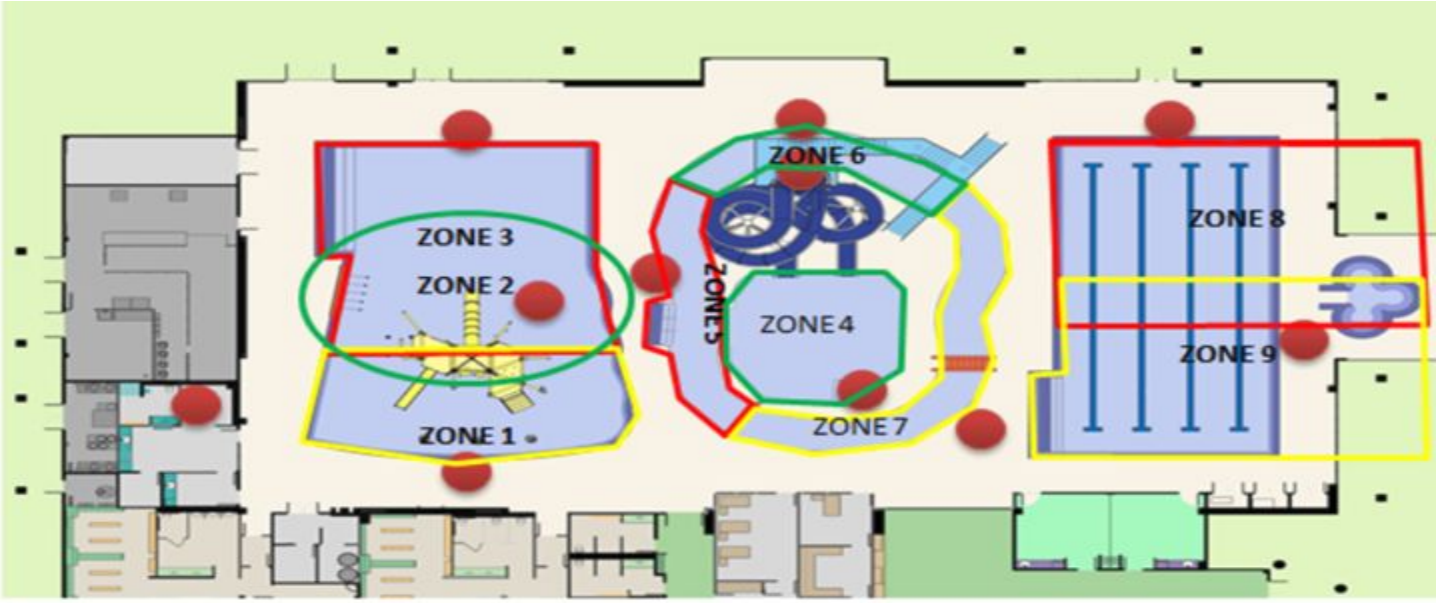
Silliman Family Aquatic Center



ZONE COVERAGE & VERIFICATION DOCUMENT REC SWIM:

Outlined below are the overall guard stations for rec swim. These stations were developed based on manikin and live body testing of each individual station at different times of day to determine location of a body on the bottom of the pool for each particular zone. At times additional zones may be added for high bather load.

Zone Coverage: Recreational Swim



ZONE COVERAGE CHART: REC SWIM

ZONE COVERAGE CHART: RECREATION SWIM
The Zone coverage chart was determined based around the manikin verification placement.

Standard Signals for Lifeguards

WHISTLE SIGNALS

1. **One short blast:** To get the attention of a guest.
2. **Two short blasts:** Assistance needed from Senior Lifeguard.
3. **One long loud blasts:** Activate EAP for ACTIVE VICTIM RESCUE or land rescue.
4. **Two long loud blasts:** Life-Threatening Emergency – air horn to be activated by Lifeguard in stands or top of slide.
5. **One long air horn blast:** Life-Threatening Emergency – Rescue Bag, Backboard, & E-Stop needed. Air horns will be kept at the top of the slide.

BE ALERT FOR ALL WHISTLE SIGNALS, WHETHER OR NOT YOU ARE ON DUTY

SILENT SIGNALS

- **Waving one or both arms in crossing pattern above head:** To get the attention of a co-worker.
- **Pointing:** Look to where I am pointing.
- **Point to a patron, then to own chest:** Send that person to me.
- **Tapping the top of your head:** Watch my water (usually refers to lifeguard to the left).
- **Raised clenched fist:** Lifeguard needs assistance.
- **Crossed arms above the head:** Stop slide dispatch or E-STOP needed.
- **Thumbs up:** Alright to resume the activity.

Lifeguard Scanning Responsibilities and Strategies

5-MINUTE STRATEGIC SCANNING STRATEGY © 2000

The 5-Minute Scanning Strategy was developed by Dr. Tom Griffiths, and is based on research done with thousands of Lifeguards around the world. This technique was also piloted with almost 3000 Lifeguards in this country. Dr. Griffiths, of Penn State University, is an internationally known lifeguard expert, author, speaker and researcher. Physiological and psychological research has shown that after 15 minutes of performing a simple task a person's performance on that task gets worse. The 5-Minute Scanning Strategy was developed to help Lifeguards stay alert while performing the task of watching the people in the pool. The strategy is based on physiological and psychological responses, and what research shows many experienced Lifeguards have already been doing to stay alert. The 5-Minute Scanning Strategy helps Lifeguards stay physically more awake by promoting a higher respiratory rate and helps them stay mentally more alert by changing the mental process every five minutes. This technique was designed to improve concentration and attention while reducing boredom. Finally, using this technique can be fun.

3-Steps in the 5-Minute Scanning Strategy Cycle

1. Change posture every 5 minutes.
2. Change Scanning Pattern every 5 minutes.
3. Count the people in your zone each time you change posture and scanning strategy, every 5 minutes.

WHEN ON-DUTY WATCHING THE POOL, MAKE A MAJOR <u>CHANGE IN POSTURE</u> EVERY 5 MINUTES, AS FOLLOWS:

- **Sit** in the Lifeguard stand for 5 Minutes.
- **Stand** on the footboard of the Lifeguard Stand, or on the deck next to the Lifeguard Stand, for 5 minutes.
- Then, **Stroll** (walk) one time around your zone for 5 minutes. (One time walking around zone.) On slow days walking for five minutes may be more effective.

<u>*At some pools it may not be practical to get out of the stand</u>, in which case the Lifeguard may choose to sit, then stand, but not stroll.

<u>During the stroll,</u>

- Keep your eyes on the people in the water
- Carry your Rescue Tube
- Keep moving – do not stop walking
- Stay along the edge of the pool (within 2' of the water)
- Greet people, but do not stop for conversation
- Remember, it is important that the people in the pool area be able to spot the Lifeguard immediately.
- When the Lifeguard is walking, it must be clear that they are "On Duty."
- Note: ***<u>Do not</u>*** *attempt to stroll when the pool deck or beach is too crowded.*

VARIATIONS OF THE 3 S's MAJOR CHANGE IN POSTURE:

OPTION 1:

1. Sit in the Lifeguard stand for 5 minutes.
2. Stand on the footboard of the Lifeguard stand, or on the deck next to the Lifeguard stand, for 5 minutes.
3. Then, Stroll (walk) one time around your zone.

OPTION 2:

1. Sit in the Lifeguard stand for 5 minutes.
2. Then, Stroll (walk) one time around your zone.
3. Stand on the footboard of the Lifeguard Stand, or on the deck next to the Lifeguard Stand, for 5 minutes.
4. Then, Stroll (walk) one time around your zone.

OPTION 3:

1. Sit in the Lifeguard stand for 5 minutes.
2. Stand on the footboard of the Lifeguard Stand, or on the deck next to the Lifeguard Stand, for 5 minutes.

REMEMBER, EYES ALWAYS ON THE WATER!!

CHANGE SCANNING PATTERN EVERY 5 MINUTES (EVERY TIME YOU CHANGE POSTURE)

WHATEVER THE SCANNING PATTERN, THE HEAD MUST MOVE.

- There is less eye fatigue when moving the head, instead of just moving the eyes.
- People can only see details in the center of their field of vision. Lifeguards need to see the details of people's faces.
- The Lifeguard has an obligation to assure people – parents get assurance from seeing the Lifeguards' head move.
- Supervisors have an obligation to assure that the Lifeguard is scanning. Supervisors have to be able to see the Lifeguard's head move, since they cannot see the eyes move from behind the Lifeguard of if the Lifeguard is wearing sunglasses.

FOLLOWING ARE SOME EXAMPLES OF SCANNING PATTERNS:

Recommended Scanning Techniques

- Mentally rehearse a rescue with the most difficult person in your zone.
- Connect the dots (people).
- Watch faces and guess what people are thinking.
- Guess the ages of people in your zone.
- Scan vertically.
- Scan horizontally.
- Scan in a circular pattern.

Advanced Scanning Techniques

- Watch faces and guess who is happy and who is sad.
- Cluster people into groups, Center on a focal person (unique) in the group and change the focal person with leapfrog.
- Bounce different colored ball of heads of people in your zone.
- What cartoon characters do you see?
- Divide people into cool color and warm color bathing suits.
- Guess the weight of people in your zone.
- Guess the heights of people in your zone.
- Visually squash the heads of people in your zone one-at-a-time.

Do not forget to look under the water and on the bottom of the pool.

COUNT THE PEOPLE IN YOUR ZONE AT THE END OF EACH 5-MINUTE PERIOD.
REMEMBER TO "VISUALLY TOUCH PEOPLE"
The facial expression on people's faces is the most important factor for Lifeguards. Watch for signs of fear or concern.

"LIFEGUARDS MUST WATCH PEOPLE'S FACES" **"THE BEST LIFEGUARDS ARE SWIVEL HEADS"**

EVERY 5 MINUTES CHANGE THE FOUR P's:

1. Posture change
2. Position change
3. Pattern change
4. Patrons change

REVIEW THE 3 STEPS IN THE 5-MINUTE SCANNING STRATEGY CYCLE

- **Change posture every 5 minutes. THE 3 S's.**
- **Change Scanning Pattern every 5 minutes.**
- **Count the people in your zone every 5 minutes.**

NOTE: *Optimal communication and responding to patrons need for help requires having a* ***rescue tube and whistle at all times.***

"YOU ALWAYS WANT TO TOUCH PEOPLE WITH YOUR VISION"

What to Do if Guests Try to Engage in Conversation While Guarding

The Lifeguard may want to be prepared with statements such as:

- "You can go to the front office and I know that they would be happy to answer any of your questions."
- "I need to keep my eyes on the pool while we talk, but I can listen to what you are saying as we walk."
- Call for a senior lifeguard by using a double whistle.

VAT – Vigilance Awareness Training

VAT (Vigilance Awareness Training) will be conducted more than 4 times a month unaware to staff. A VAT is any 3-dimensional object and includes a diving brick, and our training dummies.

If a lifeguard is unable to recognize a VAT within the required 30 seconds, then that lifeguard is immediately pulled from the rotation and given a tutorial on patron surveillance and scanning. At that time the Senior Lifeguard will decide when the lifeguard can return to the rotation, where they will be re-VATed. The Senior Lifeguard always has the power to send someone home if they determine that the lifeguard is creating an unsafe environment by staying on duty.

*Refer to: **Appendix O: VAT Training Form**

FACILITY POLICIES AND WATER PARK RULES

*NO OUTSIDE FOOD PERMITTED

*Infant food and formula are permitted.
Food may be purchased at our Otter Alley Cafe open during Recreation Swim Hours.

SWIMWEAR GUIDELINES:

Traditional swim attire is required in all pools. The intent of enforcing a swim suit policy is to maintain a clean, safe, and inviting environment for all patrons. Clothing other than swim wear can cause problems with water clarity, disinfection systems, and filtration. Anyone entering the water MUST be in a TRADITIONAL SWIMSUIT. A traditional swimsuit is one purchased for the sole purpose of swimming. A plain white t-shirt may be worn over a traditional swim suit and are available for purchase at the front desk.

DECK CHAIRS ARE FOR SITTING ONLY.

Personal items may NOT to be stored on chairs. Silliman staff reserve the right to remove any personal items from chairs. Priority for seating will be given to those with disabilities, senior citizens, and expecting and/or nursing mothers.

GENERAL POOL RULES

1. No swimming unless there is a lifeguard on duty.
2. No running on the pool deck.
3. No gum, smoking, alcohol, glass containers, competing outside food, or trays of food allowed in the facility.
4. No food or drink within 5 feet of the pool.
5. No diving allowed anywhere in the facility.
6. No roughhousing or unsafe swimming.
7. All children 2nd grade & under must be accompanied by a paid adult within in the pool area. 3rd-5th graders must have a signed waiver on-file in order to be in the facility on their own.
8. All guests entering the water area, whether you are swimming or not, must pay for entrance at the front desk.
9. Non-swimmers or children who are wearing flotation device must be accompanied in the water by an adult.
10. Bathing suits must be worn at all times by all patrons using the facility
11. Everyone must shower before entering the pool.
12. Toys and swim equipment will be restricted at the discretion of the lifeguard based on safety concerns. No squirt guns, hard balls (tennis balls, etc…) or Frisbees allowed in the pool and facility.
13. Kickboards are for lap swim or instructional use only.
14. No one will be permitted in the lifeguard chairs except the lifeguard.
15. Swimmers who have questionable swimming skills may be asked to take a SWIM TEST.
16. At any time and without warning, the lifeguards will have the discretion to limit an activity which may cause injury or inconvenience to others, as well as call for swim breaks.
17. No one with a contagious or communicable disease or open wound is permitted in the water.
18. Families with children of opposite gender must use a family changing room.
19. The Silliman Center is not responsible for any lost, stolen, or damaged items. Locks are available to rent or purchase at the Aquatics front desk.
20. We do not issue any refunds or free passes if any of the rules are broken.
21. Lifeguards have the full authority over patrons using the pool area and may enforce rules not listed as situations warrant.

AVTIVITY POOL & PLAY STRUCTURE

1. No running on or around the play structure.
2. No headfirst sliding on slides or tunnels.
3. No climbing on pipes or handrails.
4. The lifeguard on duty has the authority to administer a height limit from the recreational water attraction (wading pool) to ensure adequate safety and supervision of activities.

LAZY RIVER

1. All non-swimmers must be accompanied with an adult
2. Must go in the direction of the current.
3. Enter and exit at Lazy River stairs.

SPA

1. Elderly persons, pregnant women, infants and those with health conditions requiring medical care should consult with a physician before entering a spa.
2. No users under the age of 5 are permitted in the spa. Unsupervised use by children ages 5-14 is prohibited.
3. Hot water immersion while under the influence of alcohol, narcotics, drugs, or medicines may lead to serious consequences and is not recommended.
4. Do not use alone.
5. Long exposure may result in nausea, dizziness, or fainting.
6. Spa use is limited to 15-minutes at a time.

WATER SLIDE

1. Maximum operational load: one person, up to 300 pounds, each slide at a time.
2. **Children less than 48" tall are not permitted on slide.**
3. Eyeglasses must be securely affixed to riders with head straps.
4. Swim wear with exposed zippers, buckles, rivets, or metal ornamentation are not permitted.
5. SINGLE RIDERS ONLY! NEVER FORM CHAINS!!
6. Slide must be ridden feet first lying on your back.
7. Riders must wait for the lifeguard/attendant to give you the signal before starting the ride.
8. Keep arms and hands inside the *flumes* at all times.
9. Do not run, dive, stand, kneel, rotate, or stop in the slide.
10. At the end of the slide, obey all signs and instructions from the lifeguard/attendant and exit quickly.
11. CAUTION: For safety reasons, pregnant women and persons with heart conditions or back trouble should not ride these slides.

SPLASH POOL

1. Do not block the end of the slide.
2. Listen to instruction from Lifeguard on duty.
3. Leave the landing area quickly.

No child should ever be left unattended. All non- swimmers and children who are wearing floatation devices must be accompanied by an adult in the water AT ALL TIMES. No disposable diapers, not designed for water application, are allowed in the pools.

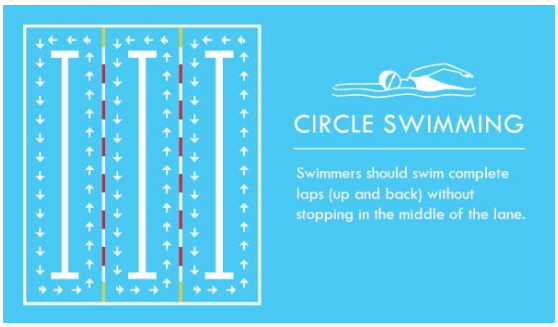
Lap Swimming Etiquette and Equipment

Lane Speeds:
Water walking/Water exercise, Slow, Medium & Fast Lanes

The most commonly enforced rule in the lap pool will be maintaining proper lane speed.

- Always try to recognize the problem before someone complains about it.
- It is always easier to move someone to a faster lane than a slower one, but that is not always going to be the case.
- Always be courteous and aware of the guest's feelings. No one likes to be told that they swim slower than the other lap swimmers.

Etiquette:



- No diving
- Circle Swim counter-clockwise.
- Lane splitting is permitted when there are 2 people in a lane.
- Once a 3rd guest plans to join the lane, circle swimming must begin. Ideally, we would not want a guest to have to initiate the circle swimming policy. Be proactive and help the guest stop the other lap swimmers.

Equipment:
Below is a list of Lap Swim Equipment that will be available to all lap swimmers, as well as things to consider for each. Other than the use of kickboards during swim lessons, none of these are allowed in the other pools.

Before the lap pool opens, a couple of kickboards should be placed in the front of every lane. All other equipment should be left in their equipment cages and put closer to the lap pool. *After the lap pool closes, all equipment should be returned to their rightful equipment cages and pushed properly against the wall.*

KICKBOARDS – The pool's kickboards can be used to build leg strength and add variety to guest's lap swimming. Please be aware of guest's using kickboards and other lap swimmers not desiring to swim at a slow pace in the same lane.

PULL BUOYS – The pool's pull buoys can be used to isolate the arms and add variety for the experienced swimmer. For increased resistance to further strengthen the arms and shoulders the guest may wish to supplement with hand paddles. Again, be aware of guest's using pull buoys and other lap swimmers.

HAND PADDLES – The pool's hand paddles are the basic rectangular design and are used to increase arm strength. They can be used in combination with pull buoys. Guests using hand paddles can easily hit other lap swimmers. Be aware and try to prevent paddle accidents.

SWIM FINS (Zoomers) – Swim fins are good for increasing speed, flexibility, and strength in kicking exercises, as well as developing stroke technique and adding variety to the guest's workout.

WATER SLIDE, LAZY RIVER, AND CHILDREN'S PLAY STRUCTURE OPERATIONS

General Water Slide Policies and Procedures

1. No goggles
2. Lay down feet first with arms and legs crossed
3. No zippers or metal parts that could scratch the slides
4. Must be 48 inches tall
5. Must be under 300 pounds
6. No standing or sitting while going down the slide
7. One person at a time
8. No lifejackets
9. Make sure patrons can swim (ask them!)
10. No physical/medical issues heart condition etc...

General Children's Play Structure Policies and Procedures

1. Watch for kids climbing up slides and sides of play structure
2. Make sure kids do not run on the play structure or beach.
3. Watch for people standing at the bottom of slides when someone is coming down them
4. One person on a slide at a time. Includes small children sitting in parent's laps
5. Watch for kids sliding under nets
6. Keep kids off the blue and white pool divider rope

Water Slide and Lazy River Training

It is the intent of this training program to meet all applicable California Code of Regulations as it relates to these elements.

Initial Training and Refresher Training: Any employee who is assigned to work as a lifeguard will receive initial training as documented below. After receiving initial training each employee will receive refresher training on an annual basis but not to exceed 18 months. Refresher training will consist of the exact elements of initial training so that consistency of reference will be maintained. Also, in this way new employees can be placed with existing employees for training ease.

Elements of Training: The elements of this training program consist of the following:

1. Complete review of Waterslide Operations & Maintenance Manuals with copies available for all trainees. Specific emphasis will be placed on general safety procedures which are highlighted in the manual. Only those areas which are specific for the attendant will be covered.
2. A Physical walk through and demonstration of each Attendant position and specific aspects of each area.

3. Complete review of facility specific rules as it relates to each of these elements. Physical copy of these rules is given to each employee.
4. Complete review of the written Emergency Action Plan for each of these elements
5. A physical walk through and demonstration and simulation of specific emergencies as outlined in the emergency action plan.
6. A shadow program in which each new attendant is paired with a seasoned attendant at each position to observe the seasoned attendant as they perform the necessary duties.
7. A shadow review program in which each new attendant will be paired with a seasoned attendant in which they will demonstrate the physical performance of the assigned regularly-scheduled duties.
8. Regular in-service training to practice specific lifeguarding and emergency skills.
9. The last component of the training program is a written acknowledgement verification form where the employee signs that he or she has been trained and is aware of the operational and maintenance responsibilities associated with each element. This form also contains a witness signature so as to verify a the person actually verifying the training is the one signing the form.

WATERSLIDE RULES

STATE OF CALIFORNIA CERTIFICATE OF COMPLIANCE CAN BE VIEWED UPON REQUEST AT THE FRONT DESK

- MAXIMUM OPERATIONAL LOAD: 1 PERSON, 300 LBS (136.4 KG).
- CHILDREN UNDER 48 INCHES (1.22M) TALL ARE NOT PERMITTED ON THE SLIDE.
- ALL RIDERS MUST BE ABLE TO SWIM AND IN GOOD HEALTH.
- NO FLOTATION DEVICES ALLOWED ON RIDE.
- EYEGLASSES MUST BE SECURELY AFFIXED TO RIDERS WITH HEAD STRAP.
- SWIM WEAR WITH EXPOSED ZIPPERS, BUCKLES, RIVETS OR METAL ORNAMENTATION ARE NOT PERMITTED.
- ONLY ONE RIDER TO ENTER THE FLUME AT A TIME. SINGLE RIDERS ONLY!
- NEVER FORM CHAINS.
- SLIDE MUST BE RIDDEN FEET FIRST LYING ON YOUR BACK OR IN A SITTING POSITION "GREEN SLIDE ONLY" (SIT UP TO GO SLOWER, LIE DOWN TO GO FASTER.
- RIDERS MUST WAIT FOR THE LIFEGUARD/ATTENDANTS START SIGNAL BEFORE STARTING THE RIDE.
- KEEP ARMS AND HANDS INSIDE THE FLUME AT ALL TIMES.
- DO NOT RUN, DIVE, STAND, KNEEL, ROTATE OR STOP IN THE SLIDE.
- AT THE END OF THE SLIDE, OBEY ALL INSTRUCTIONS BY SPLASH POOL LIFEGUARD/ATTENDANT AND EXIT QUICKLY.
- CAUTION: FOR SAFETY REASONS, PREGNANT WOMEN AND PERSONS WITH HEART CONDITIONS OR BACK TROUBLE SHOULD NOT RIDE THE RIDE.

LIFEGUARDS OR MANAGEMENT MAY ENFORCE OTHER RULES AS NEEDED TO ENSURE RIDER SAFETY THAT IS NOT LISTED AT ANY TIME WITHOUT NOTICE.

WATER SLIDE OPERATION

- MAXIMUM OPERATIONAL LOAD: 1 PERSON, 200 LBS (90.9 KG), EACH LANE.
- CHILDREN UNDER 36 INCHES (0.91 M) TALL ARE NOT PERMITTED ON THIS SLIDE.
- CHILDREN UNDER 6 YEARS OF AGE MUST BE SUPERVISED BY A RESPONSIBLE PERSON OVER THE AGE OF 16 YEARS TO USE THIS RIDE.
- NO FLOTATION DEVICE ALLOWED ON RIDE
- EYEGLASSES MUST BE SECURELY AFFIXED TO RIDERS WITH HEAD STRAP.
- SWIM WEAR WITH EXPOSED ZIPPERS, BUCKLES, RIVETS OR METAL ORNAMENTATION ARE NOT PERMITTED.
- ONLY ONE RIDER PER LANE TO ENTER THE FLUME AT A TIME. SINGLE RIDERS ONLY!
- NEVER FORM CHAINS.
- SLIDE MUST BE RIDDEN FEET FIRST LYING ON YOUR BACK OR IN A SITTING POSITION (SIT UP TO GO SLOWER, LIE DOWN TO GO FASTER) RIDERS MUST WAIT FOR THE LIFEGUARD/ATTENDANTS START SIGNAL BEFORE STARTING THE RIDE.
- KEEP ARMS AND HANDS INSIDE THE FLUMES AT ALL TIMES.
- DO NOT RUN, DIVE, STAND, KNEEL, ROTATE OR STOP IN THE SLIDE.
- AT THE END OF THE SLIDE, OBEY ALL INSTRUCTIONS BY SPLASH POOL LIFEGUARD/ATTENDANT AND EXIT QUICKLY.
- CAUTION: FOR SAFETY REASONS, PREGNANT WOMEN AND PERSONS WITH HEART CONDITIONS OR BACK TROUBLE SHOULD NOT RIDE THIS SLIDE.

Posted Rules for Activity Pool Water Slides & Splash Pool

ACTIVITY SPLASH POOL

- DO NOT BLOCK THE END OF THE SLIDE
- LEAVE THE SPLASH POOL QUICKLY AND ORDERLY

LIFEGUARDS OR MANAGEMENT MAY ENFORCE OTHER RULES AS NEEDED TO ENSURE RIDER SAFETY THAT IS NOT LISTED AT ANY TIME WITHOUT NOTICE.

IV: Dispatch Lifeguard Position/Top of the Slide Training for Water Slides

General:
Dispatch Lifeguards should be alert to control crowd behavior, ensure safe and orderly entry and exit and control the proper entry rate into the slide. Additionally, the Dispatch Lifeguard is responsible for monitoring of slide line, position guest onto landing, going over slide script, dispatching when given the "okay" sign. The Dispatch Lifeguard is also responsible for evacuating the stairs in the event of an emergency, as well as activating the emergency action plan.

The area at the top of every water slide must be supervised by at least one attendant who has continuous and direct supervision of that area and is responsible for:

- Ensuring that customers conduct themselves in a safe and orderly manner.
- Ensuring that customers enter slides or rafts/mats properly.
- Ensuring that customers are dispatched at safe intervals.
- Visually surveying all areas of the water slide that are visible from attendant's position, with the exception of the splash pool, and communicating any problems to the other attendants.
- Ensuring that customers meet the minimum and/or maximum restrictions for the slide.

Specific:
Line monitoring: To avoid being rushed by patrons you must keep guest behind yellow line on landing until you have dispatched riders. Once ready ask the next 2 guest to come onto the landing while insuring no other guest come forward.

Monitoring Height/Weight requirements: All riders must be at least 48 inches tall. If there is a question in a rider meeting this requirement check them with the height sign affixed to the railing. Insure height by placing guest against height requirement sign. All riders must be less than 300 lbs. If you have any concerns please ask the rider for their weight. If the rider refuses you must send them down the stairs. Additionally, if you have any concerns that they may get lodged within the closed slide you are to send them down the open slide.

Positioning Riders: Indicate the cautions to riders from script (attached). Have guest sit on launch platform with legs extended on the water slides behind the flow of water. Have riders hold onto the launch railing. Send riders when given the thumbs up by the Splash Entry Lifeguard.

Bringing in new riders: Once the previous riders have been dispatched bring up the next 2 riders from the line and follow the previous instructions.

Single rider: If only one rider is to go down this will be indicated by a thumbs up on the side where the rider will be going down.

Communicating Issues: If there are any issues signal to the splash entry lifeguard by whistling 2 short blasts and raising rescue tube. The splash entry guard will blow whistle 2 short times and get attention of Senior Guard who will stop water flow to slides and address the situation.

Stopping the ride: Either the dispatch or splash entry lifeguard can stop the ride for any reason.

For a general stop: The dispatch guard is to alert splash down guard by blowing whistle 2 short blast and alerting splash entry lifeguard who will do the same. The dispatch lifeguard will send all patrons behind yellow line at the stairs. When safe to do so they will give the thumbs up sign indicating they will be restarting.

For an emergency stop: The dispatch lifeguard will blow 1 long blast from air horn alerting all facility guards to activate the emergency action plan. All patrons will be evacuated and water will be stopped by Dispatch guard. Once this is done the dispatch lifeguard will escort guest down walkway and lock and secure gate before proceeding back up the slide to attend to the emergency. The ride will resume once emergency is resolved, ride is deemed safe, inspected and tested if necessary and both lifeguards are back on station and a thumbs up is given by both.

Dispatch Lifeguard Check for Each Rider:

- Height-over 48 inches
- Weight-under 300 pounds
- Check for exposed zippers, buckles, rivets, or metal objects
- Eyeglasses/goggles securely fastened
- One rider at a time per slide
- Rider in proper position
- Splash pool is clear

Dispatch Lifeguard Responsibilities for Each Rider:

1. Ask each rider if they know how to ride the ride by reading the dispatch script below.
2. Assure the rider is in the correct body position when ready.
3. Control dispatch of riders one at a time and shall not dispatch a rider until the flume is clear of obstruction and any previous rider.
4. Ensure all riders meet requirements.
    a. Rider's height is over 48 inches
    b. Rider's weight is under 300 pounds
5. Ensure eyeglasses are securely affixed to the riders.
6. Observe bathing suits for zippers, buckles, rivets, etc. and do not allow them on the slide.
7. Observe riders for any physical impairments that compromise safety and do not allow them on the slide.
8. Ensure the crowd behaves in a safe and orderly manner.
9. Monitor riders in areas visible from assigned positions.

Dispatch Script for Each Rider: The following Dispatch Script must be read to every rider behind the yellow line before entering the platform:

"All riders must follow all rules that have been posted for the slide. When riding you must be riding feet first lying on your back. Keep arms and hands crossed and inside the slide at all times. Do not dive, stand, kneel, rotate or stop in the slide. For safety reasons pregnant women, persons with heart conditions or back trouble should not ride the slide. You must know how to swim in order to go down the slide. Please exit to the stairs straight across the slide. Do you have any questions? Enjoy your ride."

(Position riders and dispatch when given all clear from Splash Entry Lifeguard)

V. Splash Pool Lifeguard Position/Bottom of the Slide Training

General:
The Splash Pool Lifeguard indicates when it is safe to dispatch the next rider by communicating with the Dispatch Lifeguard stationed at the top of the slide. Additionally, they are responsible for watching the entry of riders and insure they exit splash down pool safely. Finally, they must watch that no one comes into the splash entry from the Lazy River.

The Splash Pool must be supervised by at least one certified lifeguard who has continuous and direct supervision of that area and is responsible for:

- Ensuring that customers conduct themselves in a safe and orderly manner.
- Ensuring that customers move into and out of splash pool in a quick and orderly manner.
- Controlling running, horseplay or other unsafe behavior on pool decks.
- Ensuring pool water levels are correct and as per marked water levels.
- Correct operating water level is critical to safe operation.

Specific:
Signaling to Dispatch Lifeguard: once a rider from the open slide enters the water the splash entry lifeguard will give a thumbs up sign indicating it is safe to dispatch the next rider. If it is not safe the splash entry guard will raise rescue tube horizontally over head indicating not to dispatch rider.

Entry of riders: splash entry will watch each entry and ensure guest is safely moving to exit stairs. If guest is struggling, the splash entry guard will blow one long whistle blast will tap had with hand indicating to lazy river guard to watch his station. Splash entry guard will enter the water and make an appropriate rescue on the guest and bring to safety and then escort guest to the first aid room to fill our a rescue report. The ride will not start again until another lifeguard is stationed at the splash entry pool.

Exit of riders: guest will exit from the stairs directly in line with the stairs. All guests are expected to exit and then go across the walkway or enter the lazy river from the landing.

Stopping the ride: Either the dispatch or splash entry lifeguard can stop the ride for any reason.

For a general stop: the splash entry guard is to alert the dispatch lifeguard by blowing whistle 2 short blast and holding rescue tube horizontal above head. The dispatch lifeguard will stop riders and put them behind yellow line until given the thumbs up signal from splash entry lifeguard.

For an emergency stop: the splash entry lifeguard will blow 1 long blast from whistle alerting all facility guards to activate the emergency action plan. All patrons will be evacuated and water will be stopped by Dispatch guard or Senior lifeguard. Once this is done the dispatch lifeguard will escort guest down walkway and lock and secure gate before proceeding back up the slide to attend to the emergency. The splash entry guard will attend to the emergency and call for backup as needed. The ride will resume once emergency is resolved ride is deemed safe, inspected and tested if necessary and both lifeguards are back on station and a thumbs up is given by both.

Duties:

1. Ensure customers conduct themselves in a safe and orderly fashion.
2. Do not allow riders to block the end of a slide. Delay dispatch of next rider if the
3. slide landing area is obstructed.
4. Ensure that all riders exit the pool immediately upon splashdown. Do not permit
5. guests to sit on pool steps or congregate around pool edge.
6. Be prepared to enter splash pool to assist customer out of pool.
7. Do not allow any swimming or flotation devices in splash pool.
8. NOTE: Special attention is required at the splash pool due to reduced visibility from flowing water and the splash caused by riders entering the pool. The clarity of quiescent splash pool water is normally acceptable if no turbidity is noted and the bottom detail is clearly visible.

VI. Dispatch Lifeguard Position/Top of the Slide Training for Activity Structure Slides

General:

Dispatch Lifeguards ensure safe and orderly entry and exit and control the proper entry rate into the slide. Additionally, the Dispatch Lifeguard is responsible for monitoring of slide line, position guest onto landing, going over slide script, dispatching when given the area below is clear.

The area at the top of every water slide must be supervised by at least one attendant who has continuous and direct supervision of that area and is responsible for:

- Ensuring that customers conduct themselves in a safe and orderly manner.
- Ensuring that customers enter slides or rafts/mats properly.
- Ensuring that customers are dispatched at safe intervals.
- Visually surveying all areas of the water slide that are visible from attendant's position, with the exception of the splash pool, and communicating any problems to the other attendants.
- Ensuring that customers meet the minimum and/or maximum restrictions for the slide.

Specific:

Monitoring Height/Weight requirements: All riders must be at least 36 inches tall. If there is a question in a rider meeting this requirement check them with the height sign affixed to the railing. Insure height by placing guest against height requirement sign. All riders must be less than 200 lbs. If you have any concerns please ask the rider for their weight. If the rider refuses you must send them down the stairs. Additionally, if you have any concerns that they may get lodged within the closed slide you are to send them down the open slide.

Positioning Riders: Indicate the cautions to riders from script (attached). Send riders when the area below is clear.

Bringing in new riders: Once the previous riders have been dispatched bring up the next 2 riders from the line and follow the previous instructions.

Communicating Issues: If there are any issues signal to the splash entry lifeguard by whistling 2 short blasts and raising rescue tube. The splash entry guard will blow whistle 2 short times and get attention of Senior Guard who will stop water flow to slides and address the situation.

Dispatch Lifeguard Check for Each Rider:

- Height-over 36 inches
- Weight-under 200 pounds
- Check for exposed zippers, buckles, rivets, or metal objects
- Eyeglasses/goggles securely fastened
- One rider at a time per slide
- Rider in proper position
- Splash pool is clear

Dispatch Lifeguard Responsibilities for Each Rider:

1. Assure the rider is in the correct body position when ready.
2. Control dispatch of riders one at a time and shall not dispatch a rider until the flume is clear of obstruction and any previous rider.
3. Ensure all riders meet requirements.
    a. Rider's height is over 36 inches
    b. Rider's weight is under 200 pounds
4. Ensure eyeglasses are securely affixed to the riders.
5. Observe bathing suits for zippers, buckles, rivets, etc. and do not allow them on the slide.
6. Observe riders for any physical impairments that compromise safety and do not allow them on the slide.
7. Ensure the crowd behaves in a safe and orderly manner.
8. Monitor riders in areas visible from assigned positions.

Dispatch Script for Each Rider: The following Dispatch Script must be read to every rider behind the yellow line before going down the slide:

"All riders must follow all rules that have been posted for the slide. When riding you must be riding feet first. Do not dive, stand, kneel, rotate or stop in the slide. For safety reasons pregnant women, persons with heart conditions or back trouble should not ride the slide. Please leave the splash pool quickly and orderly."

VII. Posted Rules for Lazy River

1. All non-swimmers must be accompanied by an adult.
2. Any guest wearing a life jacket must be within arms reach of an adult.
3. All guests must go in the direction of the current
4. All guests must enter and exit at Lazy River stairs only.

VIII. Lazy River Lifeguard Responsibilities

General:
Observe patron use in the specific zone applied to, provide emergency rescue as indicated, and provide safe usage amongst guest.

Specific:
Entry: Lazy River Lifeguards make sure all guests enter area safely. Do not allow diving or jumping. Guest must do a feet first front entry in a safe manner, preferably easing in.

Exit: guest may exit at any point except interior in drop zone area. Ensure guest get out safely. If a guest is having problems direct them to exit at stairwell.

Stopping the lazy river: any guard on station may stop the river for any river to ensure safety.
Lifeguard would blow whistle 2 long whistle blast and Senior Lifeguard or slide dispatch would stop river flow from e-stop. Pool would be cleared and then the emergency would be tended to. The lazy river would be restarted once all lifeguards are in place and give thumbs up to restart river. The senior lifeguard would start the motor to resume the river.

Area of coverage: depending upon the amount of guests utilizing the lazy river would indicate how many lifeguards are needed. There will always be a minimum of 3 with a maximum of 4. Coverage areas are in the lifeguard manual.

IX. Emergency Evacuation Plans

ENCLOSED TUBE SLIDE (PURPLE):

1. **Splash entry lifeguard initiates stop dispatch with raised arms and rescue tube in horizontal position. Blow whistles 2 long blast.**

2. **Dispatch Lifeguard blows air horn 1 time.**

3. **Senior lifeguard initiates Emergency stop and stops water flow to slides, sends break guard to assist in evacuating stairs and closing gate to stairwell.**

Simultaneously:

Dispatch lifeguard sends patrons down and out of stairwell and locks stairwell with assistance of break guard. Afterwards, dispatch lifeguards attempting to assess the situation by yelling to the guest and finds out why they are not going down the slide and trying to calm them down. (Scared, stopped for no reason, injured etc.)

4. Senior lifeguard will bring rescue equipment. Dispatch lifeguard slowly enters slide going down the rope that has been brought by senior guard and secured to railing and descends to a point slightly above patron. Talks to patron and then determines if patron is able to descend with the rope or if EMS needs to be contracted. Indicates to Senior Guard by yelling what is going on.

A. If patron's situation is assessed as a serious injury/spinal/immovable because of physical proportions:
EMS immediately called via deck phone by break guard who is at stairwell. 2 long whistle blasts blown all pools are cleared and patrons evacuated to lobby. Senior lifeguard and dispatch lifeguard calms patron vocally, Senior lifeguard enters slide to assist if needed and monitor vitals until EMS arrives. Care and extrication is turned over to EMS lifeguards will climb out of slide at this point.

B. If patron's situation is assessed as non-serious or non-life threatening such as purposeful blocking of slide, patron is scared, or refuses to move: Dispatch lifeguard climbs down slide aided by rope. Dispatch guard tries to coax patron down slide and assist utilizing rope and gloves, Gives instruction to patron to slowly slide down on bottom while holding onto the rope and any available useful equipment. Call EMS only if unsuccessful at freeing patron or patron becomes hurt or goes into shock.

5. Once patron is securely exited slide they are monitored and given any necessary care. A rescue report is documented.

6. Lifeguards go back on station and patrons let back into the facility.

7. Once a thumbs up is given by all lifeguards the water flow is turned back on.

8. Senior Guard resets E-Stop by unlocking and pressing green button then relocking E-Stop Shut off. Gives thumbs up to resume ride.

OPEN TUBE SLIDE (GREEN):

1. **Splash entry lifeguard initiates stop dispatch with raised arms and rescue tube in horizon position. Blow whistles 2 long blast.**
2. **Dispatch lifeguard blows air horn 1 time.**
3. **Senior lifeguard initiates Emergency stop and stops water flow to slides, sends break guard to assist in evacuating stairs and closing gate to stairwell.**

Simultaneously:
Dispatch lifeguard sends patrons down and out of stairwell and locks stairwell with assistance of break guard. Afterwards, dispatch lifeguards attempts to assess the situation by yelling to the guest and finds out why they are not going down the slide and trying to calm them down. (scared, stopped for no reason, injured etc.)

4. Senior lifeguard will bring rescue equipment. Dispatch lifeguard slowly enters slide holding onto the sides of the slide and descends to a point slightly above patron. Talks to patron and then determines if patron is able to descend with assistance or if EMS needs to be contracted. Indicates to Senior Guard by yelling what is going on.

   A. If patron's situation is assessed as a serious injury/spinal/immovable because of physical proportions:
   EMS immediately called via deck phone by break guard who is at stairwell.
   2 long whistle blasts blown all pools are cleared and patrons evacuated to lobby.
   Senior lifeguard and dispatch lifeguard calms patron vocally, Senior enters slide to assist and monitor vitals until EMS arrives. Care and extrication is turned over to EMS.

   B. If patrons situation is assessed as non-serious or non-life threatening such as purposeful blocking of slide, patron is scared, or refuses to move:
   Dispatch lifeguard tries to coax patron down slide and assist by giving guest instruction to slowly move down the slide on their bottom or if able to stand and hold onto the sides of the slide and walk down. If necessary a rope can be lowered for the patron to utilize. Call EMS only if unsuccessful at freeing patron or patron becomes hurt or goes into shock.

5. Once patron is securely exited slide they are monitored and given any necessary care. A rescue report is documented.

6. Lifeguards go back on station and patrons let back into the facility.

7. Once a thumbs up is given by all lifeguards the water flow is turned back on.

8. Senior Guard resets E-Stop by unlocking and pressing green button then relocking E-Stop Shut off. Gives thumbs up to resume ride.

LAZY RIVER EMERGENCY EVACUATION PLAN:

1. Lifeguard initiates stop water flow with raised arms and rescue tube in horizontal position.
2. 2 long whistle blast indicates emergency and to stop river flow.
3. Lifeguards direct patrons to exit at the stairwell and assist in any rescue.

Simultaneously:
Senior lifeguard verifies the Emergency stop and stops water flow to slides, sends break guard to assist in evacuating from stairwell or Basic Life Support.

- Senior lifeguard and break lifeguard(s) bring rescue equipment.
- Initiating Lifeguard makes appropriate rescue with assistance of other guards.
- EMS immediately called via deck phone by break guard who is at stairwell.
- 2 long whistle blasts blown all pools are cleared and patrons evacuated to lobby.

If patron's situation is assessed as non-serious or non-life threatening then the situation is remedied.

1. Once patron has securely exited lazy river they are monitored and given any necessary care. A rescue report is documented on incident.

2. Lifeguards go back on station.

3. Once a thumb up is given by all lifeguards the water flow is turned back on.

4. Patrons let back into area

X. EMERGENCY STOP (E-STOP) PROCEDURES

1 Air Horn Blast signals to all staff on duty that E-stop will be activated.

AIR HORN LOCATIONS

Water Slide Dispatch – Remote E-Stop

WATER SLIDE DISPATCH

1. If you hear 1 air horn blast, activate e-stop by pressing the red button.
2. If you hear 2 long whistle blasts and see that it is a life-threatening emergency that would require the shutting down of the Activity Pool Play Structure, Lazy River, and/or the Water Slides, activate e-stop by initiating 1 air horn blast & then pressing the red button.
3. If there is an emergency on or in the slide, activate e-stop by initiating 1 air horn blast.

SENIOR LIFEGUARD

1. If you hear 2 long whistles blasts and determine that the e-stop is needed, activate e-stop by initiating 1 air horn blast.

GROUND E-STOP

To be used as back-up e-stop if needed.

SILLIMAN FAMILY AQUATICS CENTER LIFEGUARD
WATER SLIDE AND LAZY RIVER OPERATOR TRAINING DOCUMENTATION

I _____ have been trained and have been demonstrated and have demonstrated back the proper operation of the 2 water slides and lazy river at the Silliman Family Aquatic Center.

Additionally, as part of my training, I have watched the "Silliman Center Water Slide and Lazy River Training Video", found on the Newark Guard Website. https://www.youtube.com/watch?v=DMnGD8kS-A8

I am fully aware of my attendant duties, emergency shut off, safety, and emergency procedures as it relates to the green slide, the purple slide and the lazy river. I am fully aware what is required prior to opening and during operations of these features and if for any reason feel the ride is unsafe that I will not allow it to open and will notify management to correct the situation. I have been made aware that I am responsible for the safety of the operation and opening and operations of these features. I realize any deviation to proper procedures and documentation will be considered willful negligence on my part and grounds for separation.

EQUIPMENT CARE

In general, lifeguards should always use and put away all equipment with great care.

LIFEGUARD RESCUE TUBES: Please wrap the slack around the tube after use and hang the tubes in the guard room. Please use tubes that are covered with a sleeve.

RING BUOYS : Make sure buoys are properly coiled and ready for use before assuming your guard position.

BACKBOARDS : Make sure to check all straps before opening of facility

NON FACILITY EQUIPMENT: These are not allowed to be used only under the approval of the Sr. Guard.

SAFETY LINE BUOYS: Do not drag the buoys on deck. The buoys are made of soft plastic and easily crack and become waterlogged.

MICROPHONE: The P.A. System is not to be set up for music over the loudspeaker. If the system is used for any other purpose, whoever sets it up is responsible for putting it away and turning off the system.

INSTRUCTIONAL FITNESS EQUIPMENT: Kickboards, diving rings, hoops or any other instructional equipment is not allowed to be used in the recreation swim program unless given special permission to do so by the Senior Lifeguard or Aquatics Coordinator.

LANE LINES: As the lane lines are being put in and taken out, treat them with care. Do not let them bang against the side of the pool. DO NOT OVER TIGHTEN THE LANE LINES.

FANNY PACKS: It is your responsibility to wear your pack when on duty and to keep it stocked and updated as needed.

MAINTENANCE DUTIES

There are many aspects to pool maintenance; some of which include cleaning bathrooms, emptying trash, hosing the deck or locker rooms, scraping gum, cleaning drains, etc.

Maintenance and facility cleanliness is the

RESPONSIBILITY OF ALL STAFF! EVERYONE CLEANS!

It is up to everyone to provide a clean and safe environment for our guests.

I understand that if I fail a VAT, I will receive remedial training. Remedial training can take place during the shift, after my shift or on another scheduled date. Remedial training will be in the form of being re-educated and reminded of the 10/20 rule and the scanning strategy with the Senior Lifeguard on duty. Or serve as a shadow guard for an entire rotation and will then be put back on rotation and re-VATed at that time.

If the Lifeguard meets standards at that point, they will be allowed to continue on rotation. If the Lifeguard once again fails their VAT, then they will be sent home that day with an appointment to meet with Aquatic Coordinator the next business day.

Further issues will result in being removed from the schedule completely. A scheduled meeting with the aquatic coordinator will be required before returning to lifeguard duty.

I understand that if I fail an audit, I will receive remedial training. Remedial training can take place during the shift, after my shift or on another scheduled date. Remedial training will be in the form of being re-educated and reminded of CPR/ Lifesaving skills with the Senior Lifeguard on duty. There will be period of self-study before being re-audited on CPR/Lifesaving skills.

If the Lifeguard meets standards at that point, they will be allowed to continue on rotation. If the Lifeguard once again fails their audit, then they will be sent home that day with an appointment to meet with Aquatic Coordinator the next business day.

Further issues will result in being removed from the schedule completely. A scheduled meeting with the aquatic coordinator will be required before returning to lifeguard duty.

SENIOR LIFEGUARD SIGNATURE:

_____

SECOND AUDIT PASSED: ☐ YES ☐ NO

IF AUDIT IS NOT PASSED SEND STAFF MEMBER HOME AND EMAIL AQUATIC COORDINATOR.

AQUATIC COORDINATOR REVIEW:
_____ Date: _____

City of Newark
Silliman Family Aquatic Center

EMPLOYEE HAND BOOK ACKNOWLEDGEMENT

I _____ have received a copy of the Silliman Family Aquatic Center Aquatic Staff Manual. I understand that it is my responsibility to know all information covered within this manual. I fully understand that this book is updated frequently and information can change at any time. If I have any questions regarding any of the martial I will ask the aquatics coordinator to clarify any questions.
